Dr. Huiping Guo

Project Background

- Create an app to fill the gap in support for people with cognitive impairments and memory problems.
- Colonel(ret) Michael Malone served 32 Year in the Army and sustained a Traumatic Brain Injury (TBI).
- Inspired by his experience, he developed an app to assist those with cognitive impairments and memory problems, now known as Want2Remember App®

Achieved Objectives

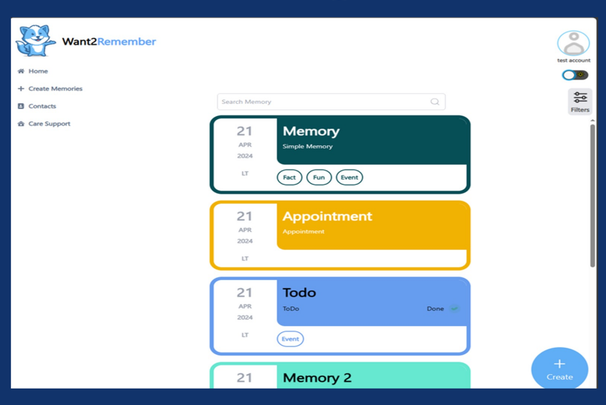

- Implemented the display duplicate and merge contacts functions.
- Refactored standard and custom memory templates for user editing.
- Added People Picker for managing contacts directly on web memories.
- Expanded on custom templates by enabling syncing and saving of created memories from web to mobile.
- Added filter bubbles that display filter Icons of selected category and the memories.

Project Overview

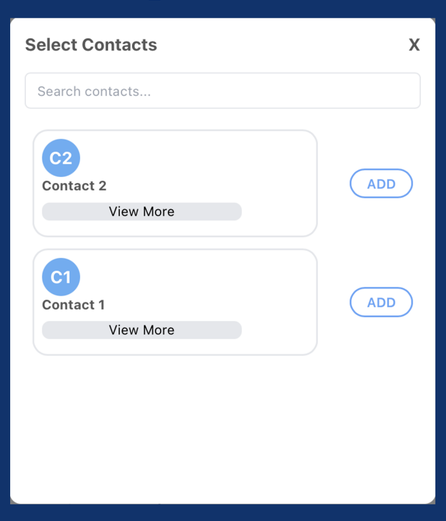

- Teams are split into two groups: mobile team and web team.
- Each team involves a pair of teammates who work on tasks that are assigned to them.
- Each team would review other peer's task if assigned.
- Teams work on tasks that are assigned by the liaison on the Jira software board.
