Tele-Tower Checklist

TeleTower Scaffold Checklist (up to 12 foot platform height):

Setting up the scaffold (placing the platform on the scaffold):

- ☐ Two angle braces in place securing the base structure.

For platform height 6' or more:

- ☐ Guard Rails Top, Mid and their end chains are in place.
- ☐ All four angle braces are in place securing the platform (scaffold has total of six angle braces).

Before anyone goes aloft:

- ☐ All four platform lift pins in place.
- ☐ Outriggers extended if base less than 1/3 the height of the platform.
- ☐ Wheels are locked.
- ☐ Needed PPE, tools and lanyards assembled?
- ☐ No height adjustments allowed while anyone is on the scaffold.
- ☐ If a separate ladder is used, secure the ladder to the platform.

Person signing below verifies above conditions are met before going aloft:
