SEMINAR ENGR 4970

in interdisciplinary STEM research

January 20 - May 16, 2026

Thursdays of even weeks
3:05-4:20 pm

Room
ASCB 132 / E&T C-256

Grading
Credit / No credit

Overview:

This course is designed for students, faculty, and other stakeholders to present research findings in a seminar format

Course Objective:

To provide a global perspective on the state of the art STEM research, and professional development, by promoting discussion of current topics in research and engineering from guest lectures and staff members

Refreshments for attendees will be provided before the seminar talk.
