WORM WORK

Keeping the community clean and healthy!

Recycling

Recycling stations are labeled to sort paper, plastics, metals, and glass.

Worms & Composting

Worms improve soil health and plant growth by breaking down organic waste. We provide DIY setups and advanced composting bins.

Before...

& After

Community Involvement

- Holiday decor and fun characters encourage community involvement on the idea of sustainability and biodiversity

WHY Sunflowers?

- Sunflowers attract pollinators like bees who help food crop.
- Sunflowers improve the soil and the toxins in the air
- Sunflowers add beauty with their bright bloom
