About the Survey

- Total N=3,000 (+/-1.8%) Los Angeles Residents
  - Antelope Valley, Long Beach, San Fernando Valley, San Gabriel Valley, SELA, South LA
- San Fernando Valley
  - Random Sample N=500 (+/-4.4%)
    - Residents of SFV randomly selected so that each member has an equal chance of being chosen
  - Community Sourced N= 160
    - Participants selected by accessibility and represent the network of community-connected residents of SFV

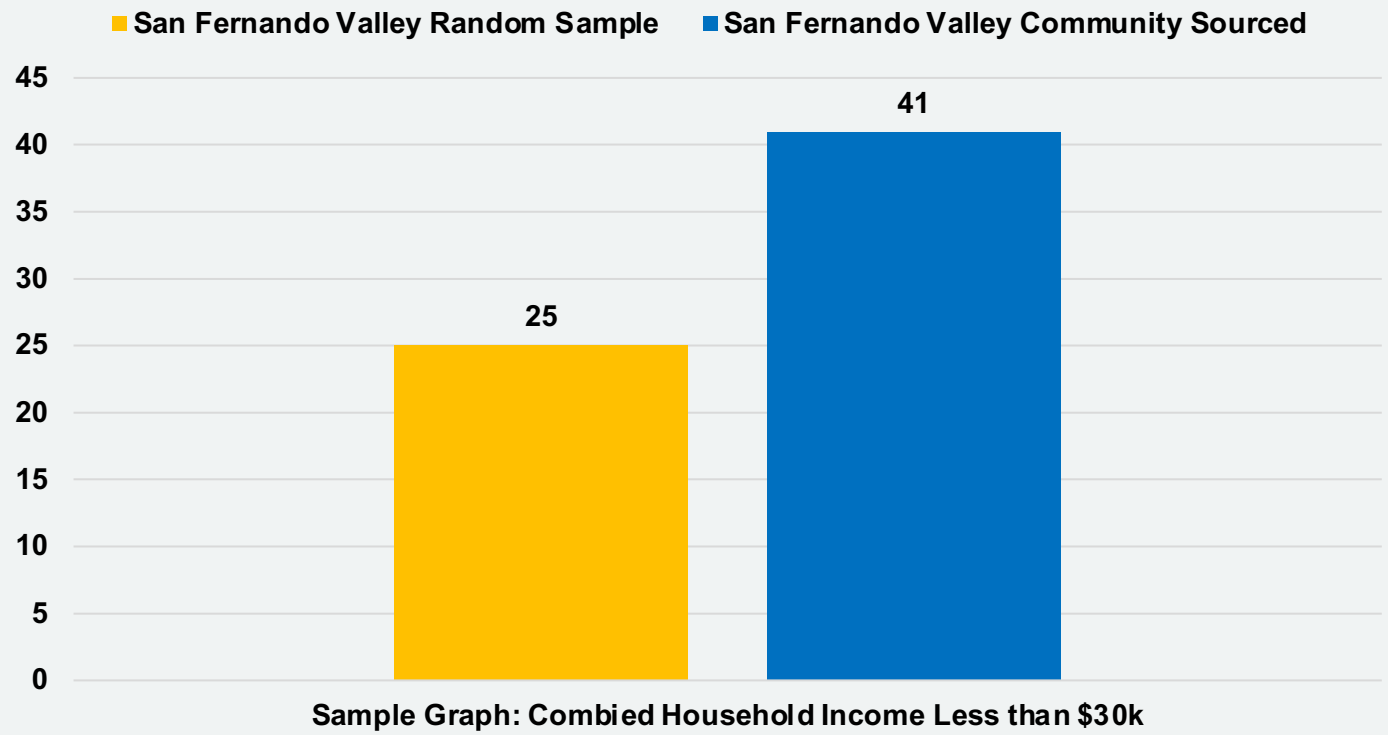

- Focus is on pandemic recovery

About the Survey

- Conducted by BSP under the direction of Matt Barreto, PhD
- Field Dates: November 16, 2022 – January 14, 2023
- English & Spanish
- Mixed Mode: 75% online, 25% telephone

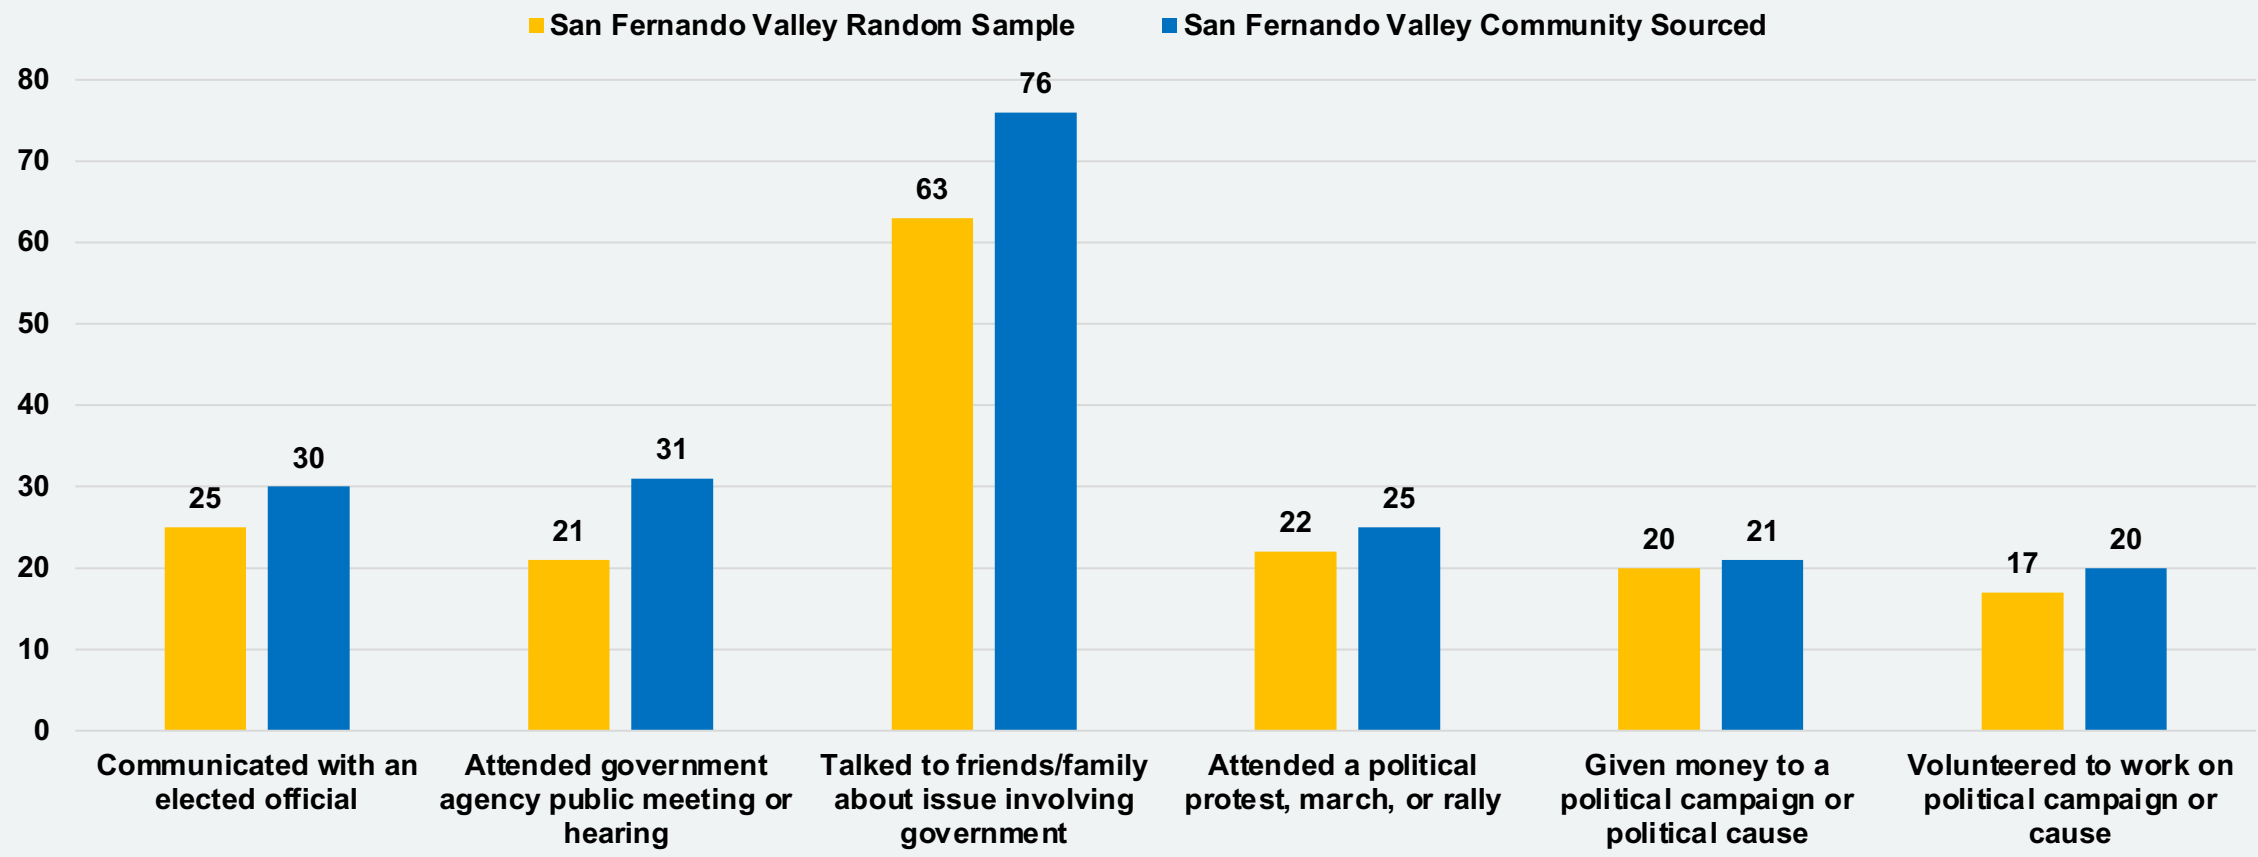

Roadmap to Understanding the Results & Comparisons

- SFV random sample
- SFV community sourced sample

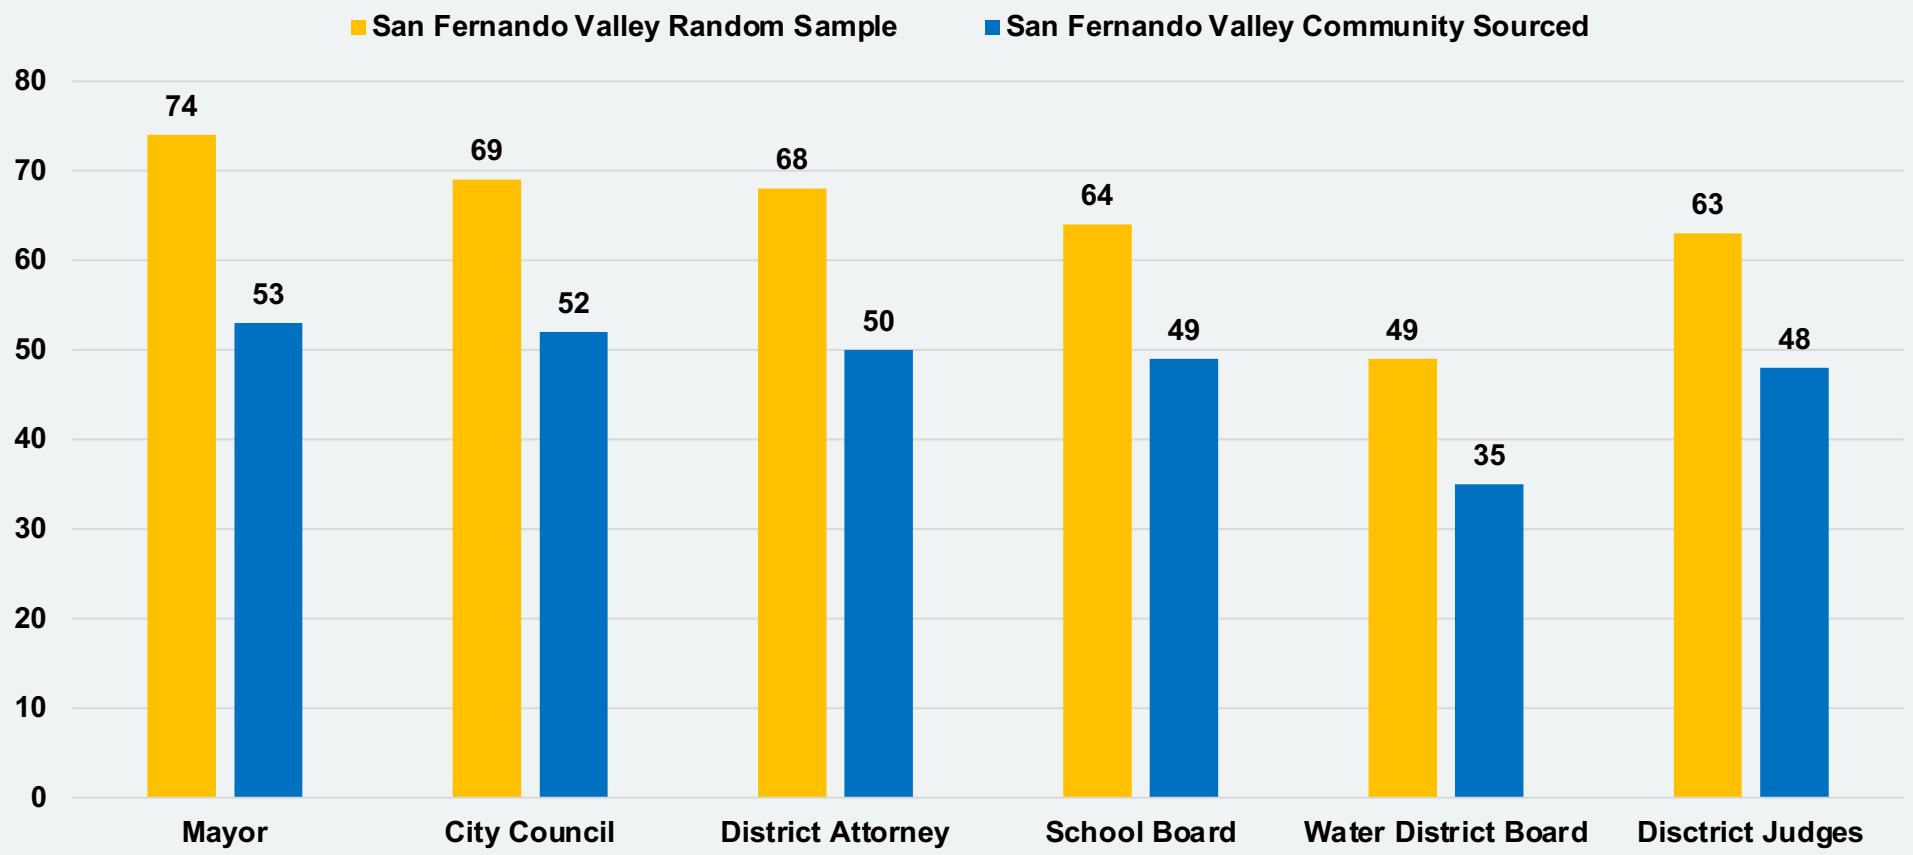

Sample Graph: Combied Household Income Less than $30k

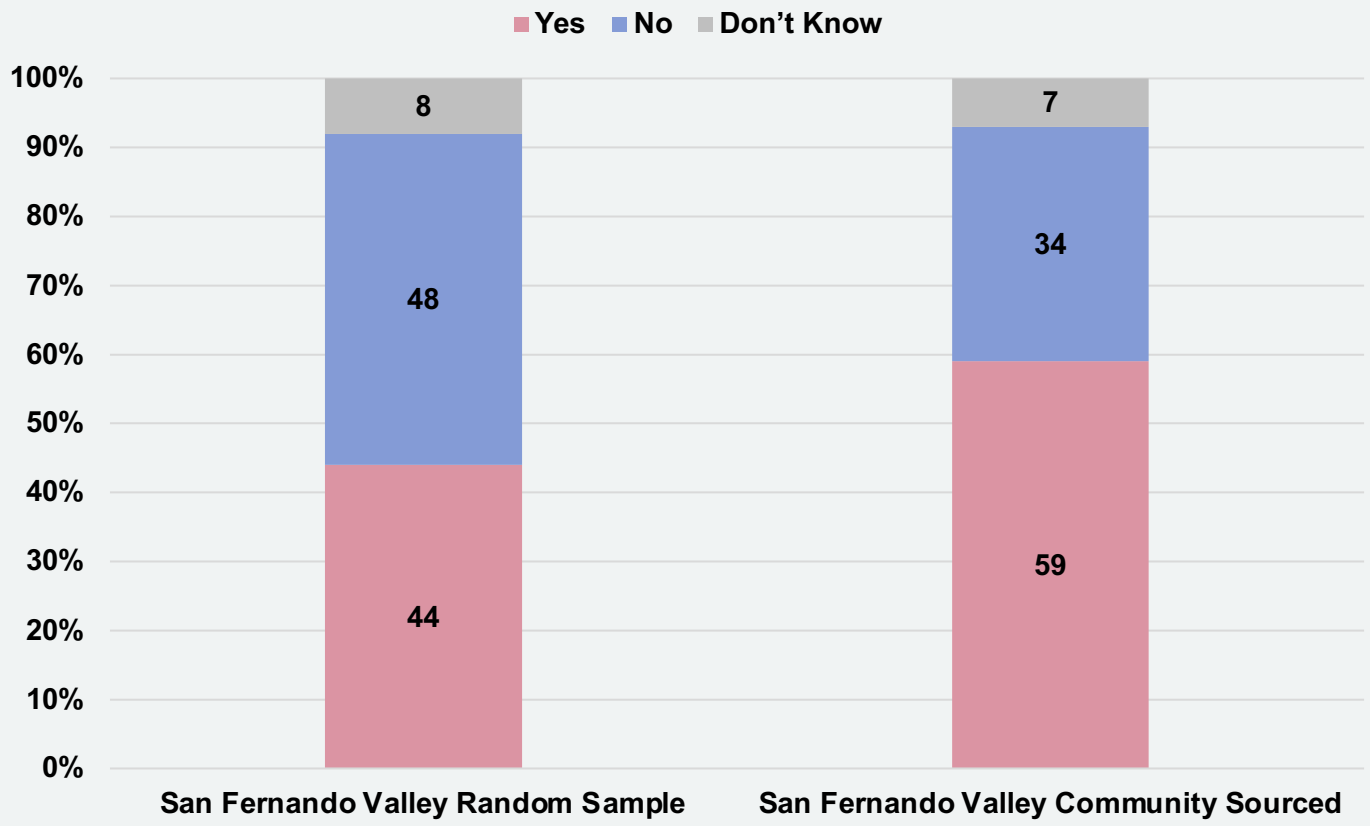

SFV respondents were extremely likely to talk with friends/family about an issue involving government during the pandemic

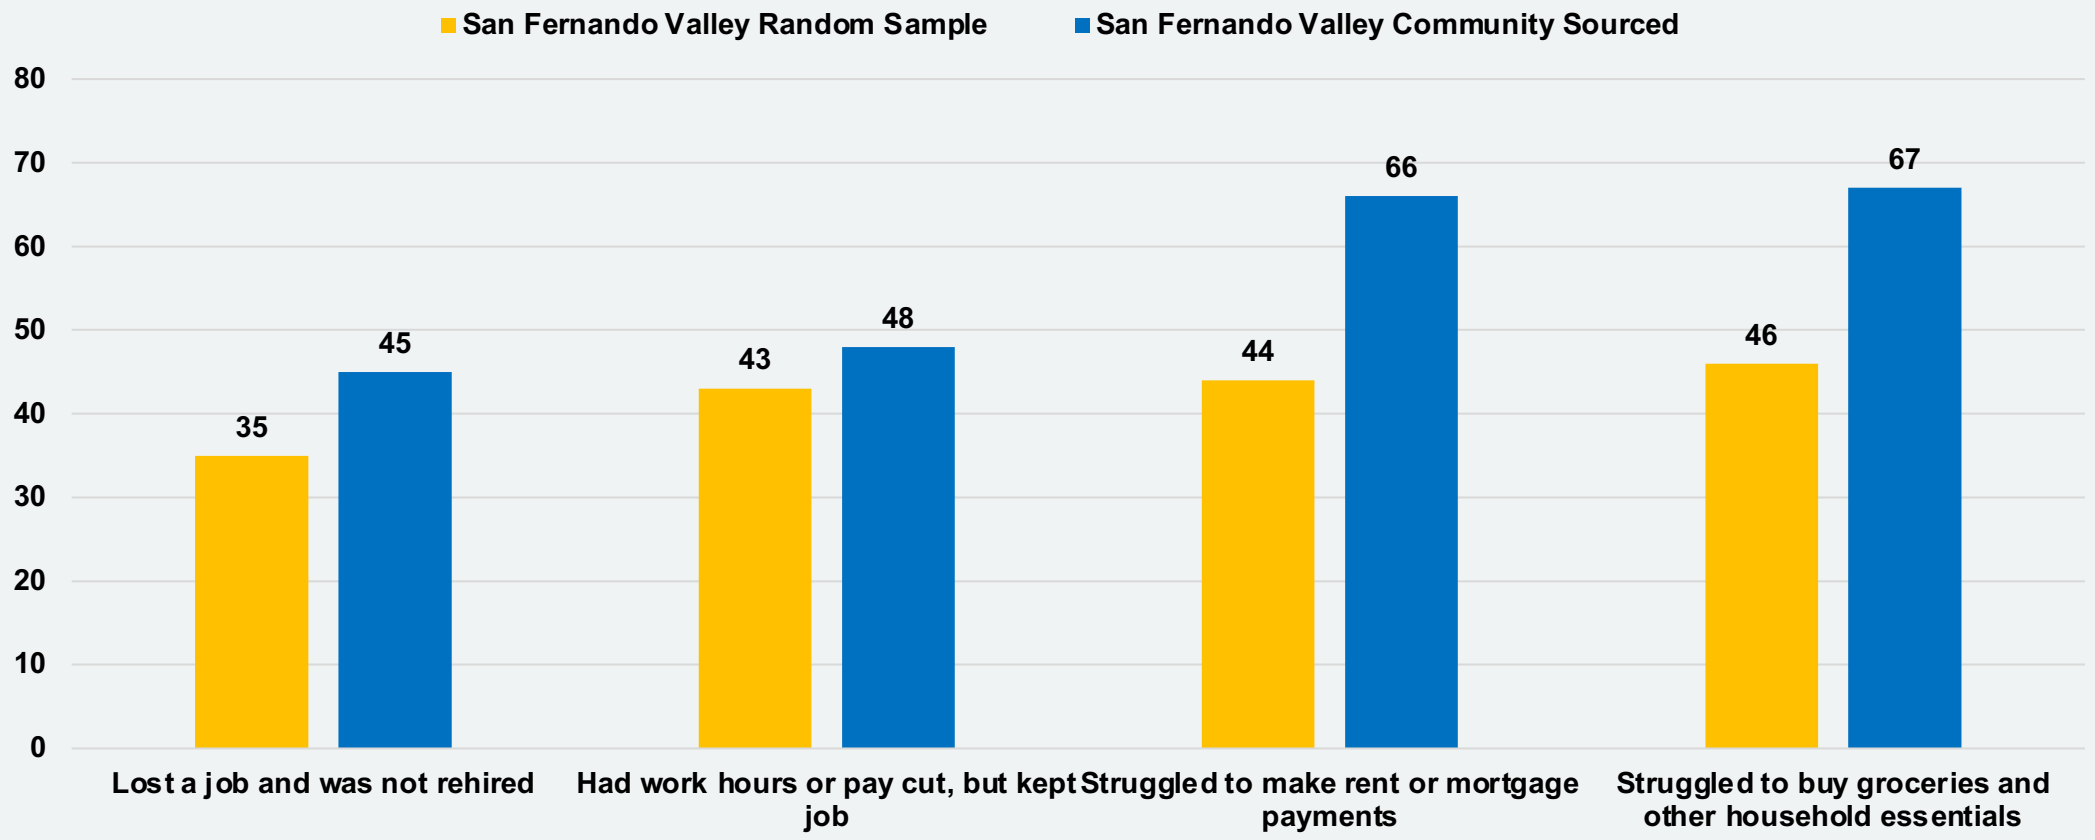

Majorities of SFV respondents reported voting for several local public offices

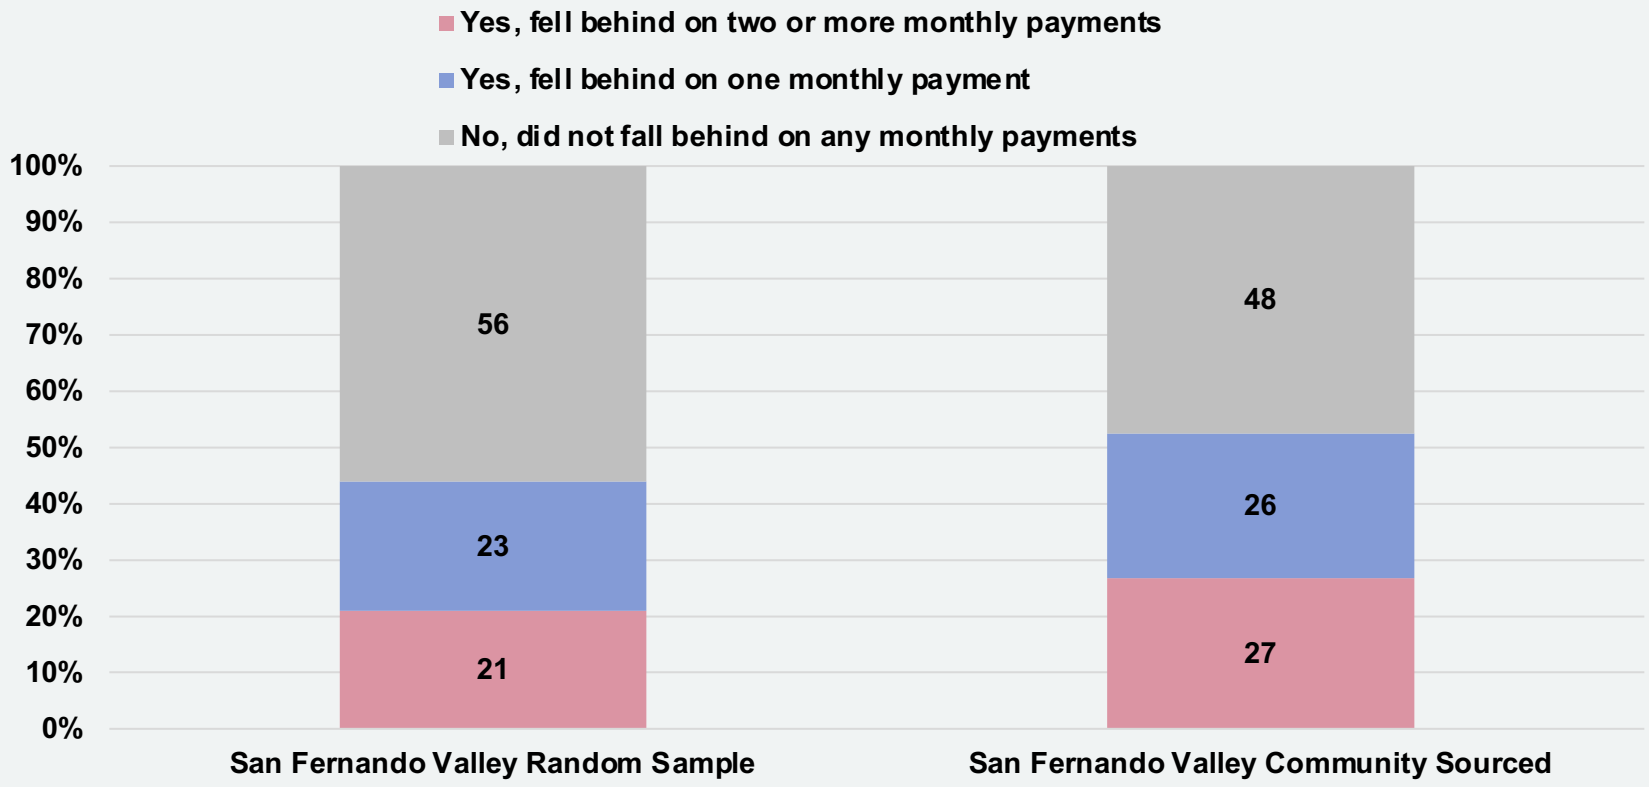

Voter engagement efforts reached fewer than half of SFV respondents in the 2022 election cycle

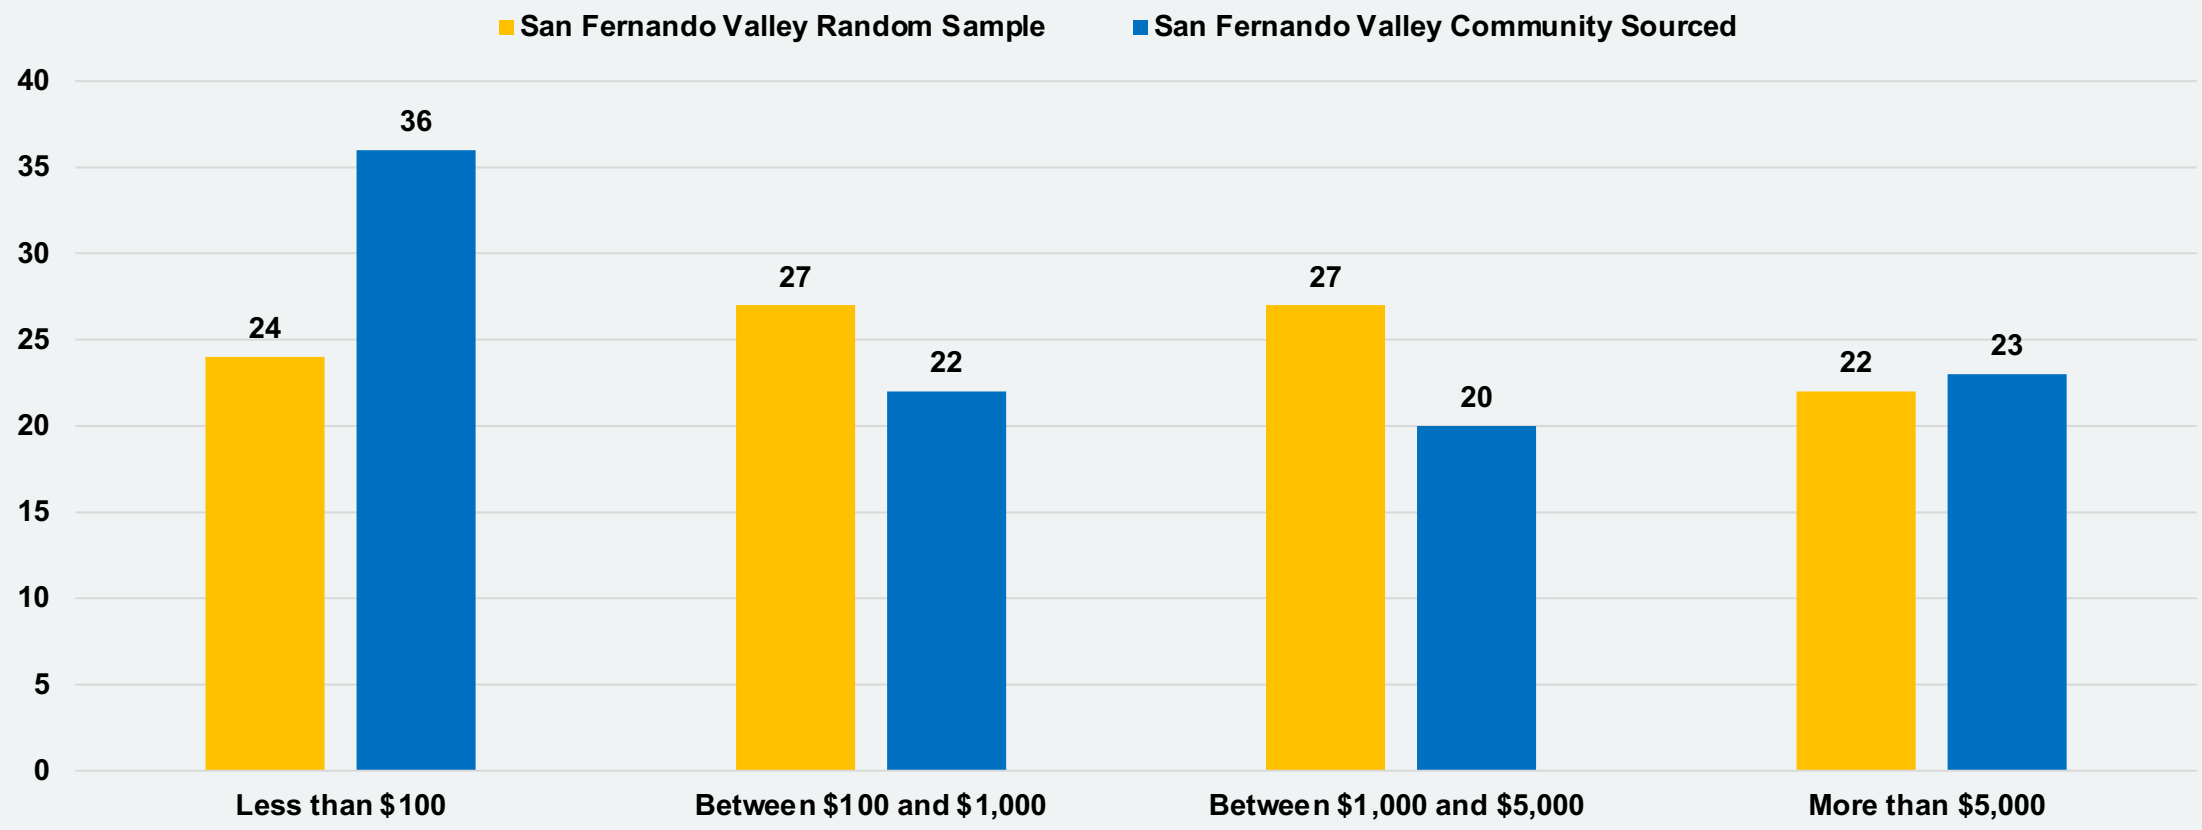

Close to half struggled with employment and struggled to make grocery and rent/mortgage payments during the pandemic

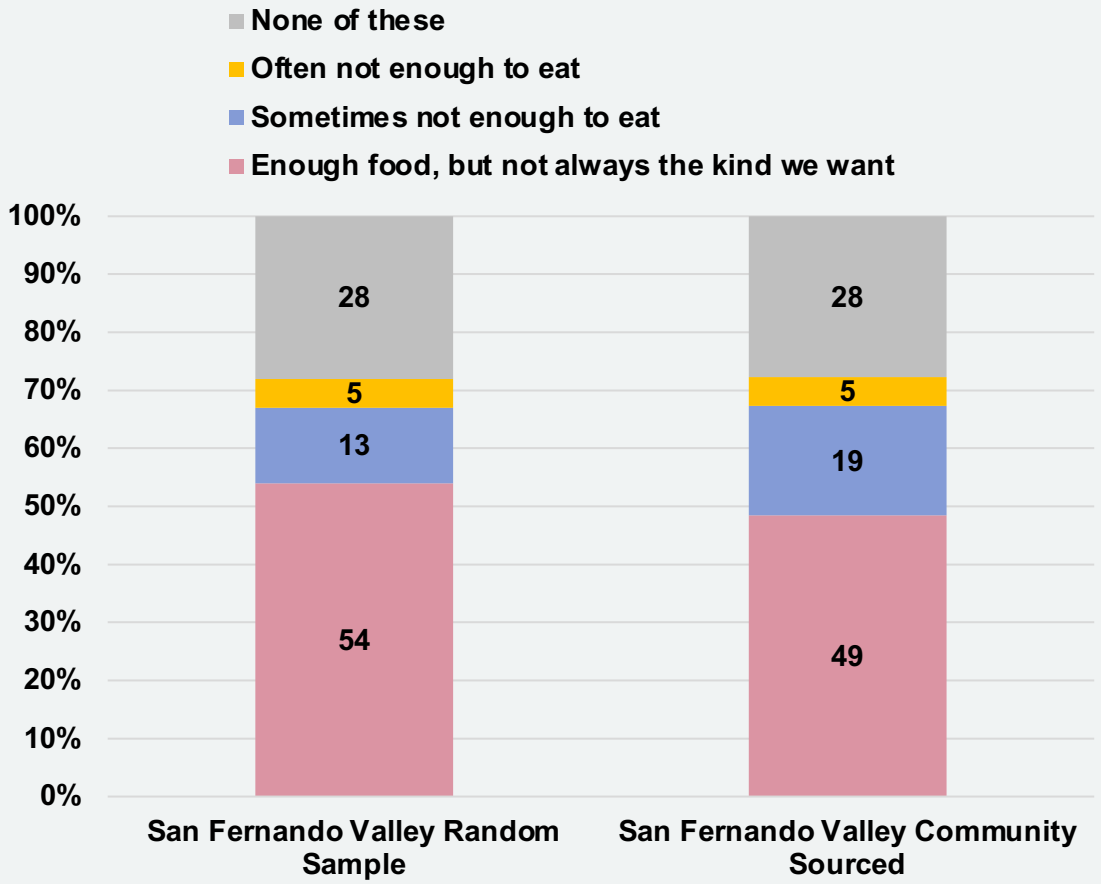

Close to half of SFV respondents fell behind at least 1 monthly payment (rent, mortgage, car, utility, etc.) since the pandemic began

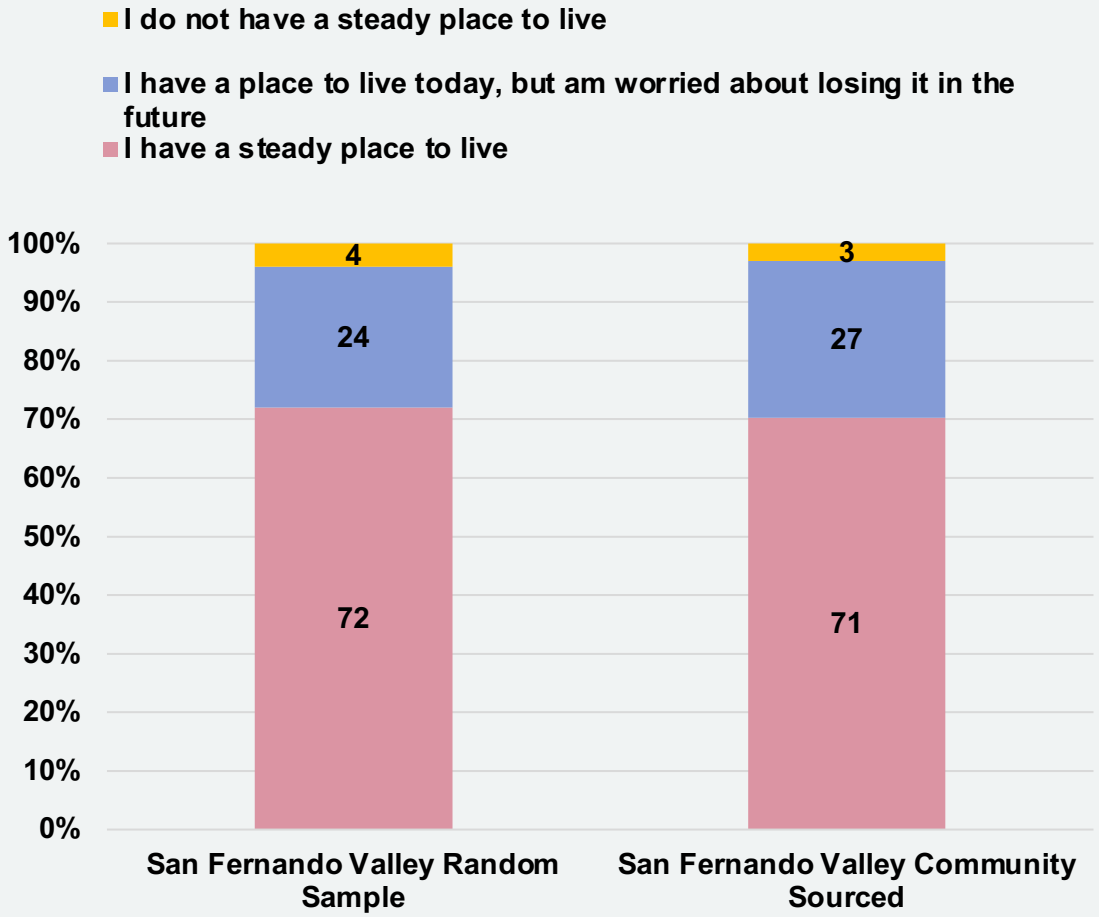

An alarming amount reported having less than $100 saved for emergencies

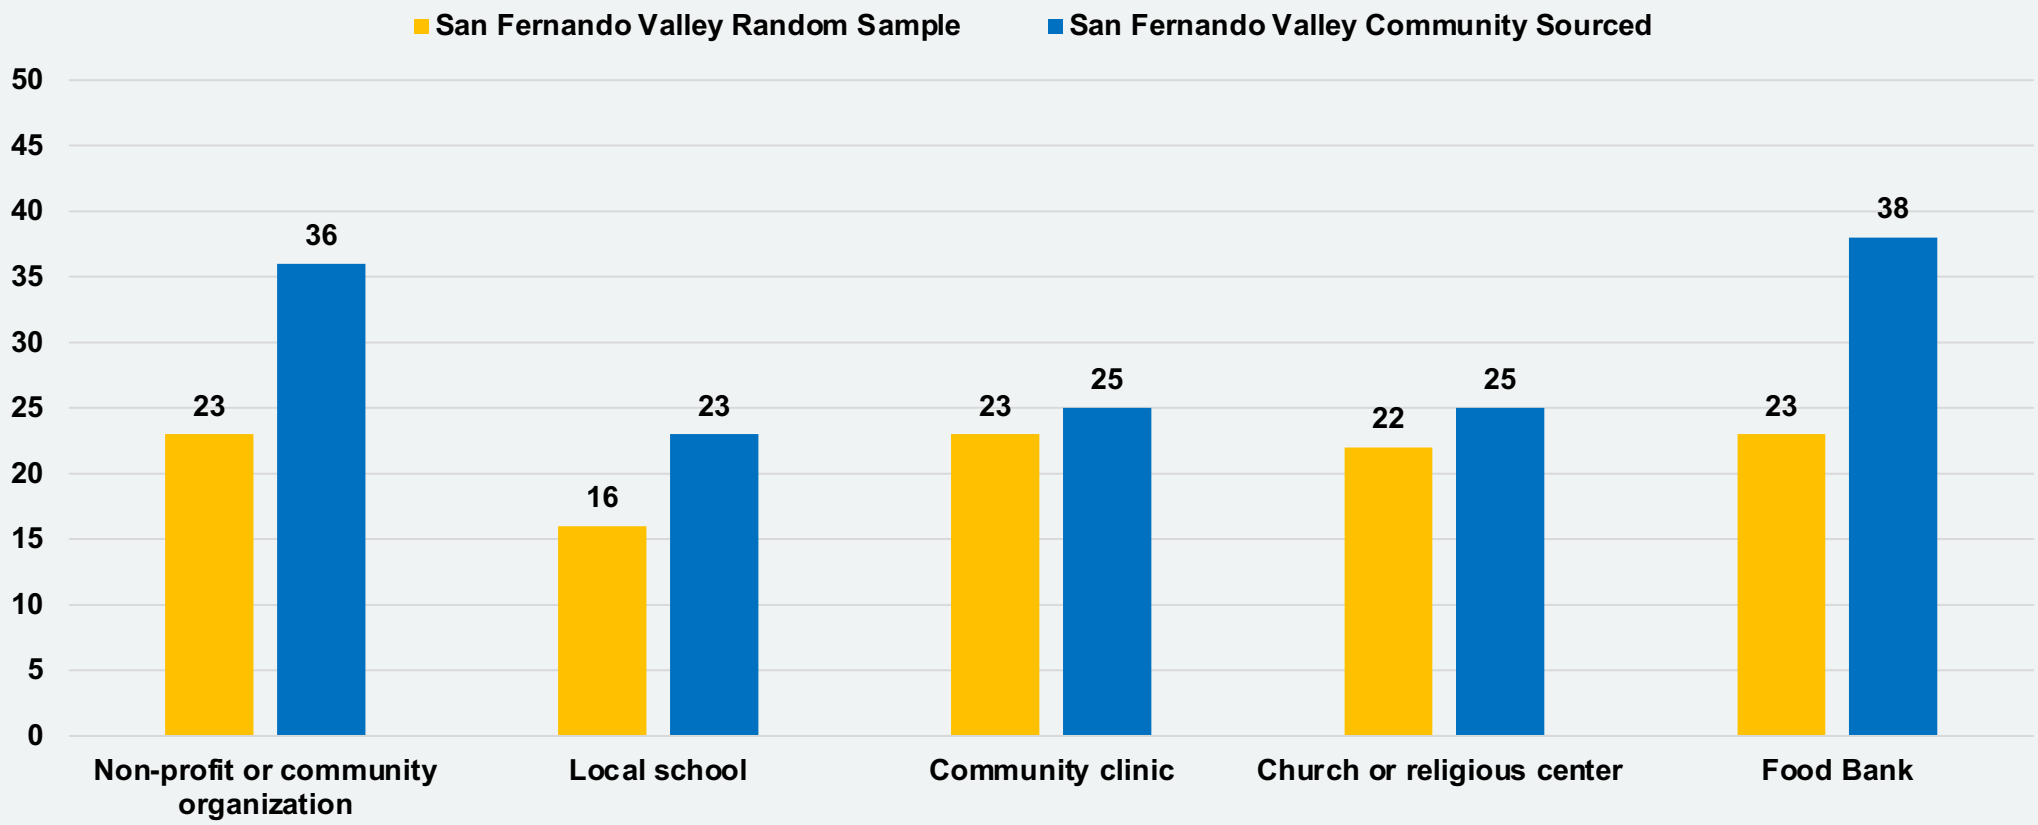

About 2 in 10 face food insecurity and about 3 in 10 face housing insecurity

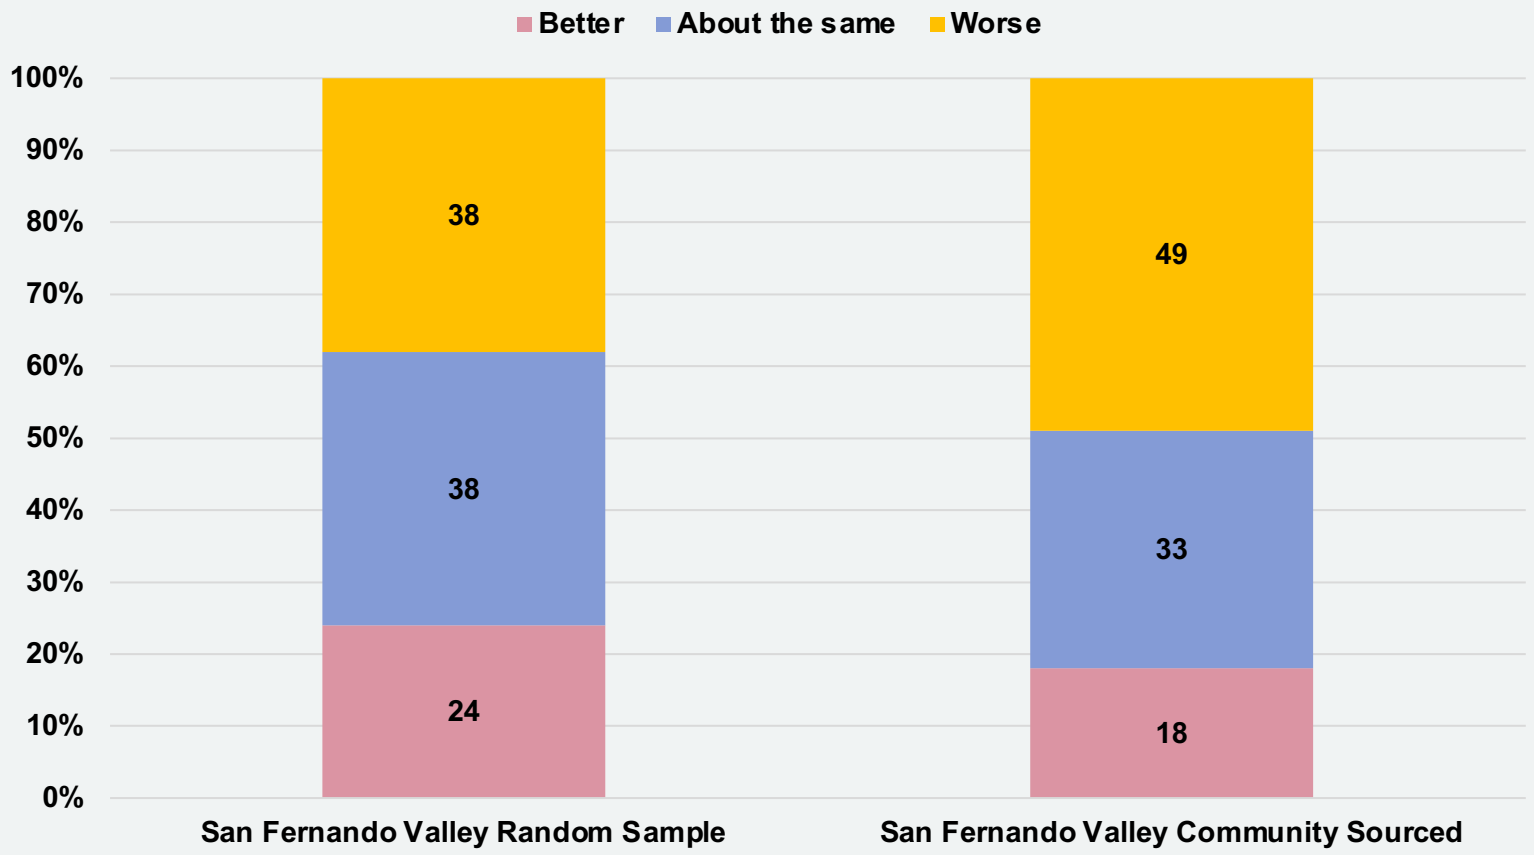

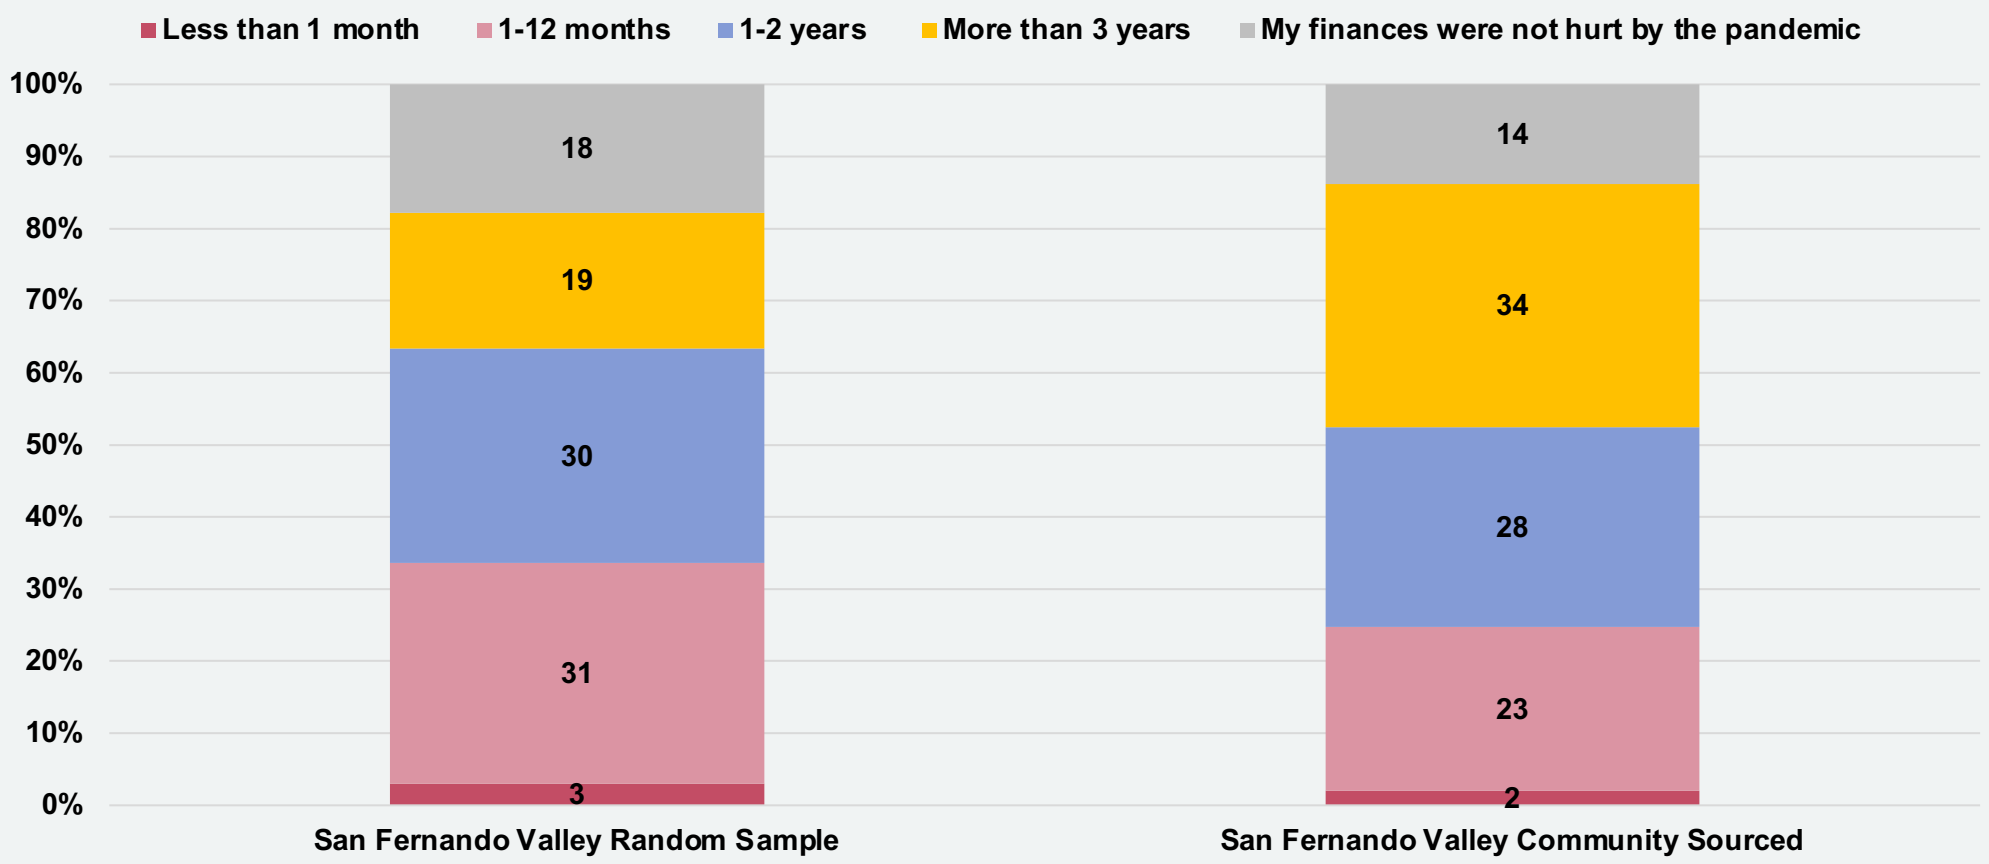

About 1 in 4 have relied on several organizations for access to essential needs

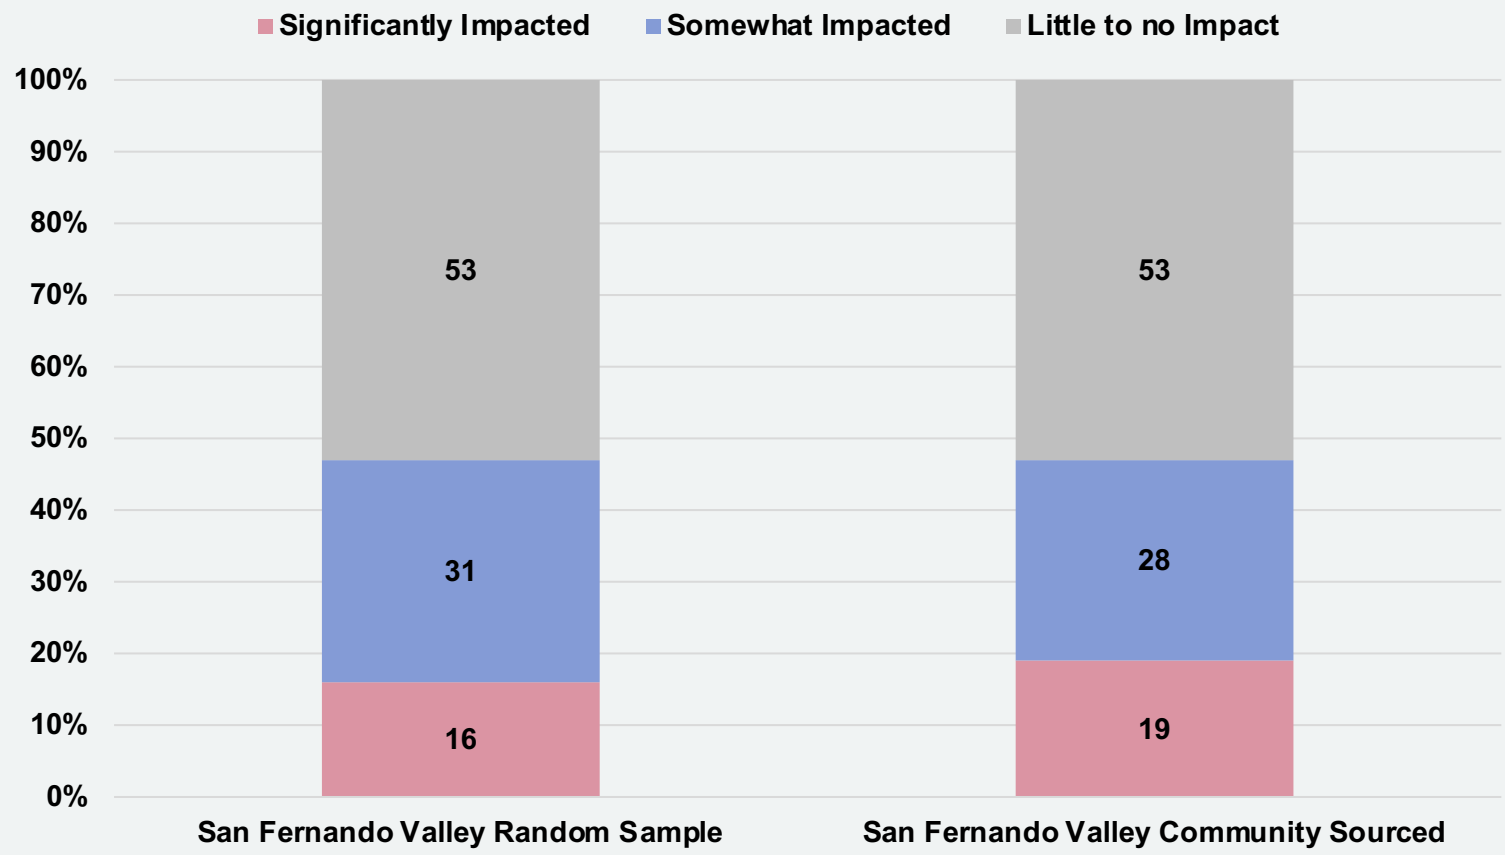

The financial situation of over a third of SFV respondents worsened since the pandemic began

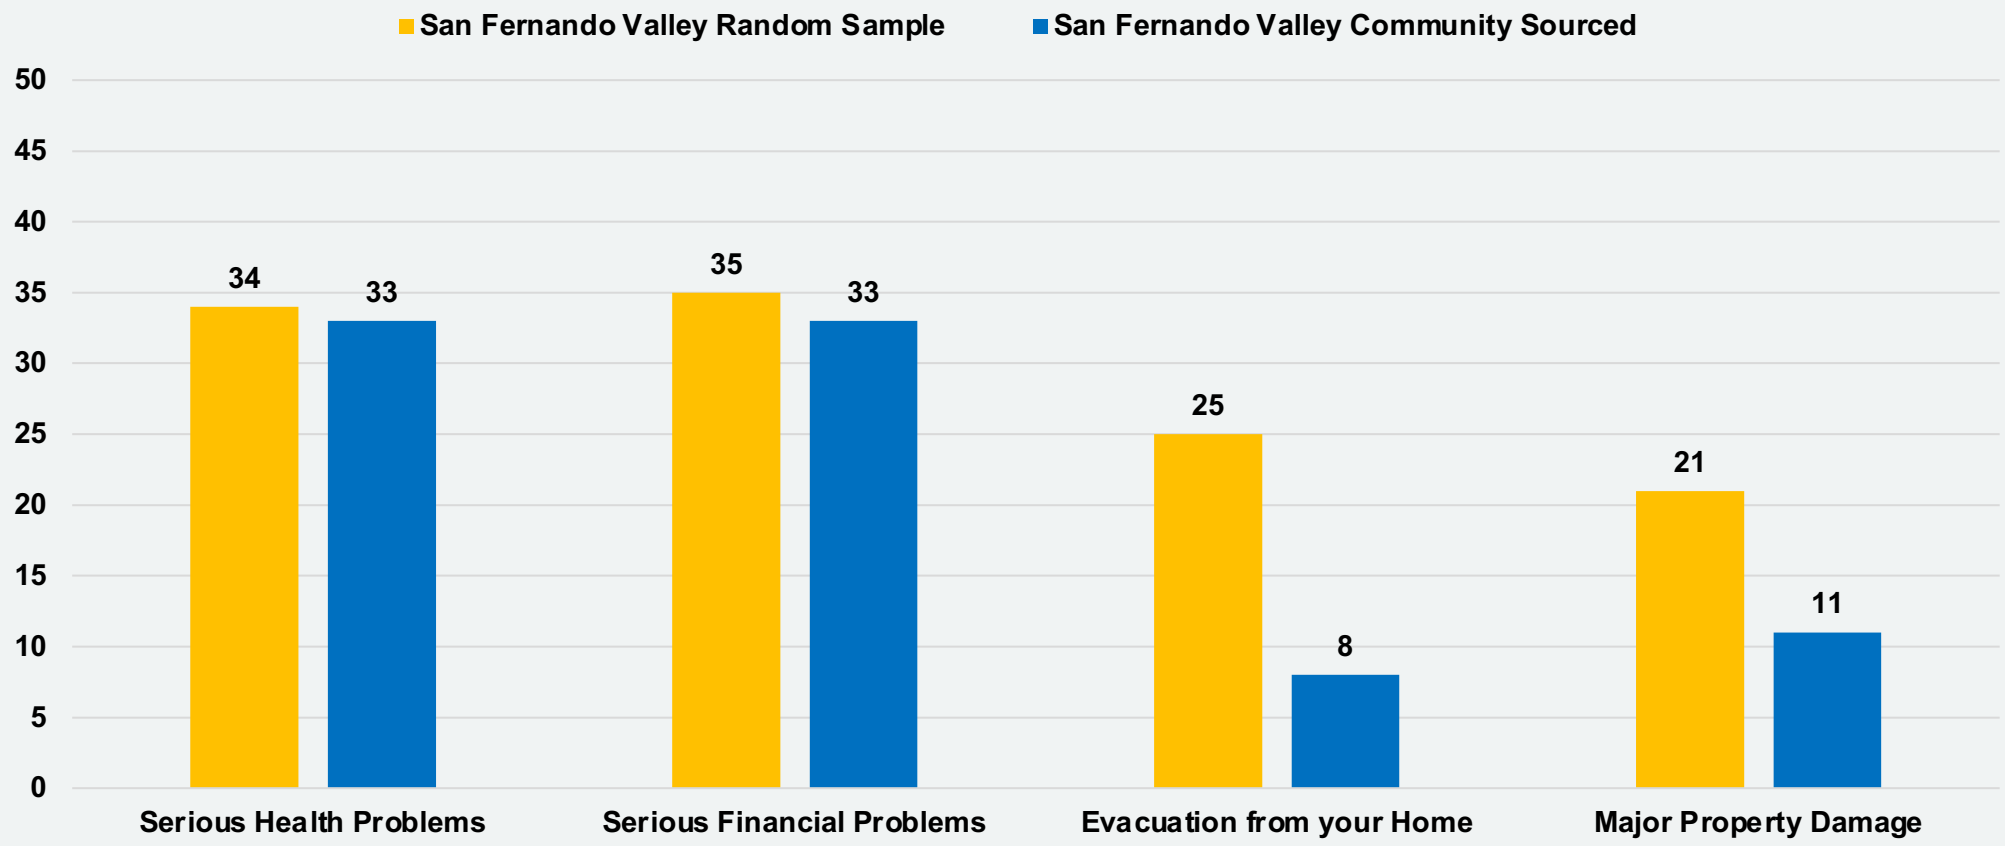

1 in 5 respondents believe it will take them more than 3 years to recover economically

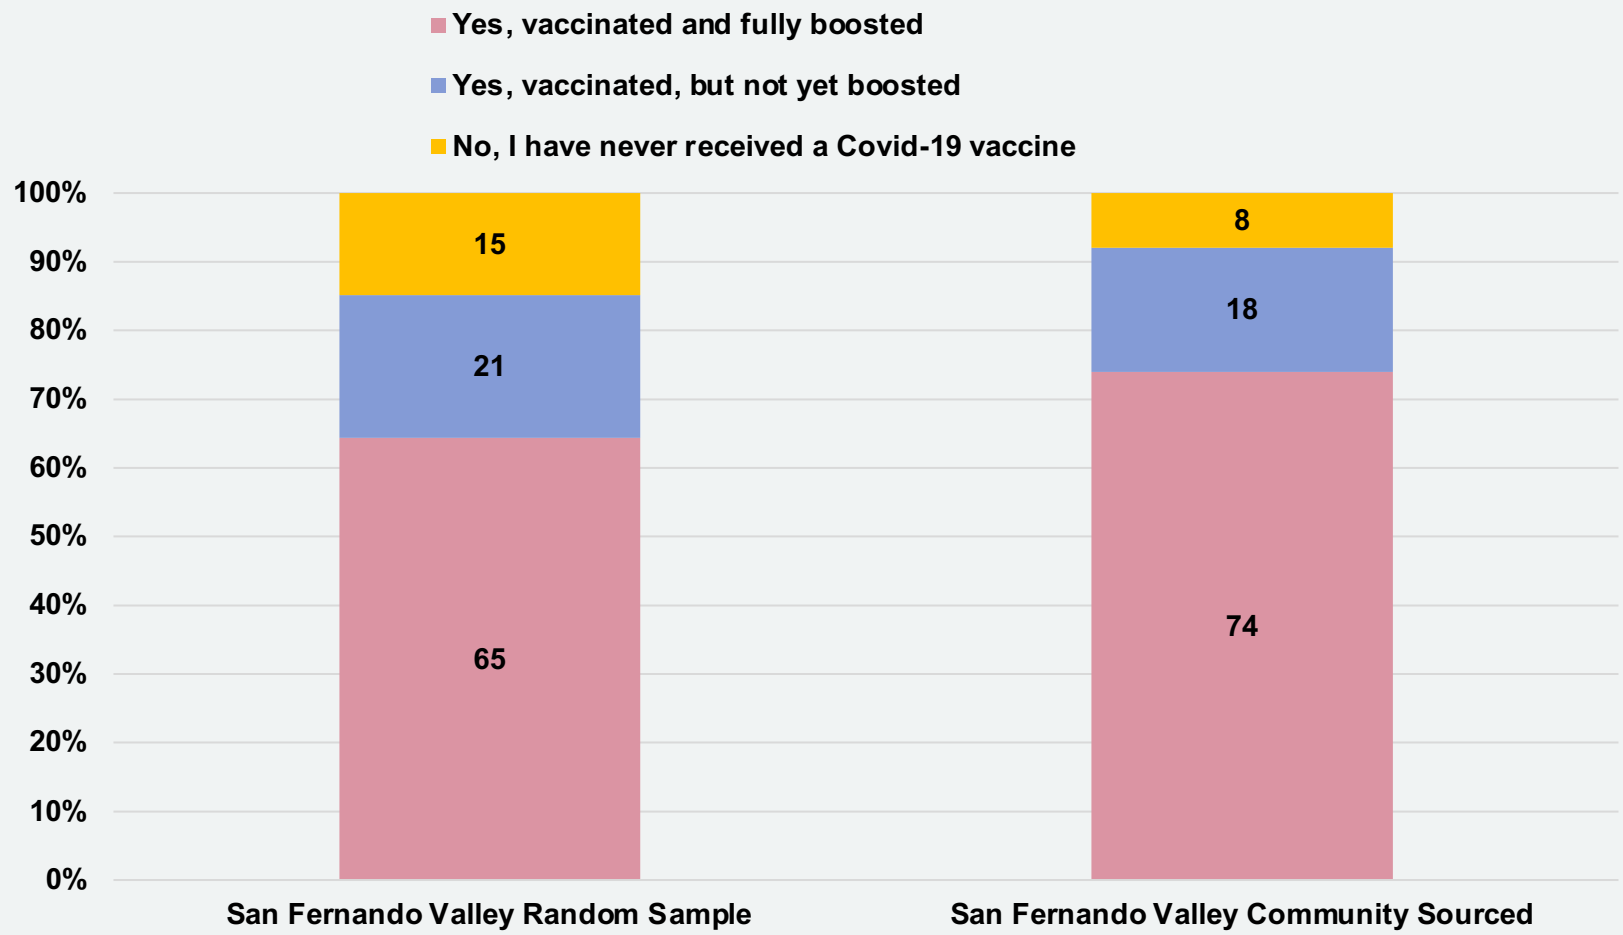

About half reported having been affected by extreme weather (heat, wildfires, drought, etc.)

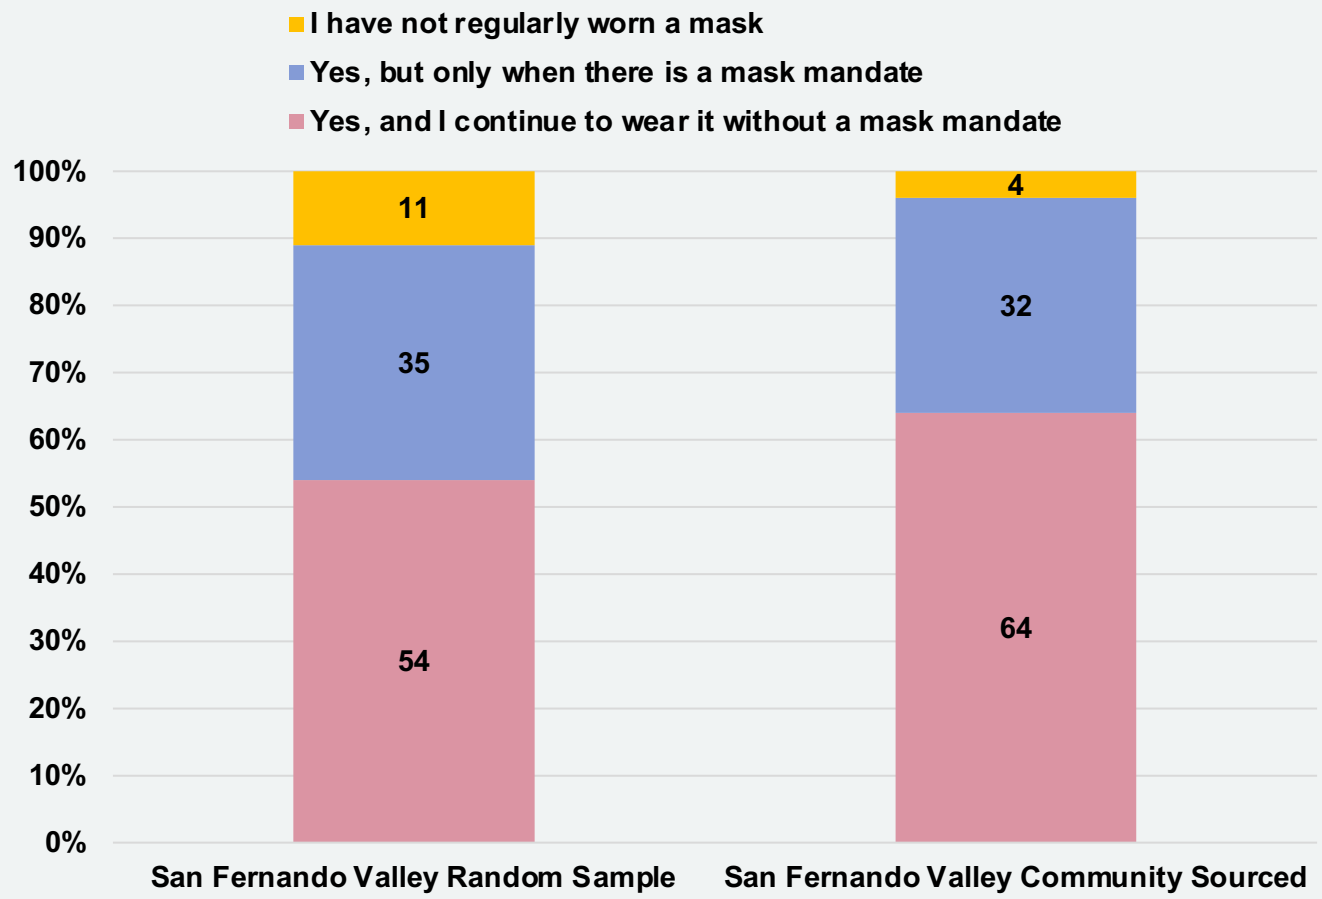

About a third reported suffering serious health and financial problems due to extreme weather

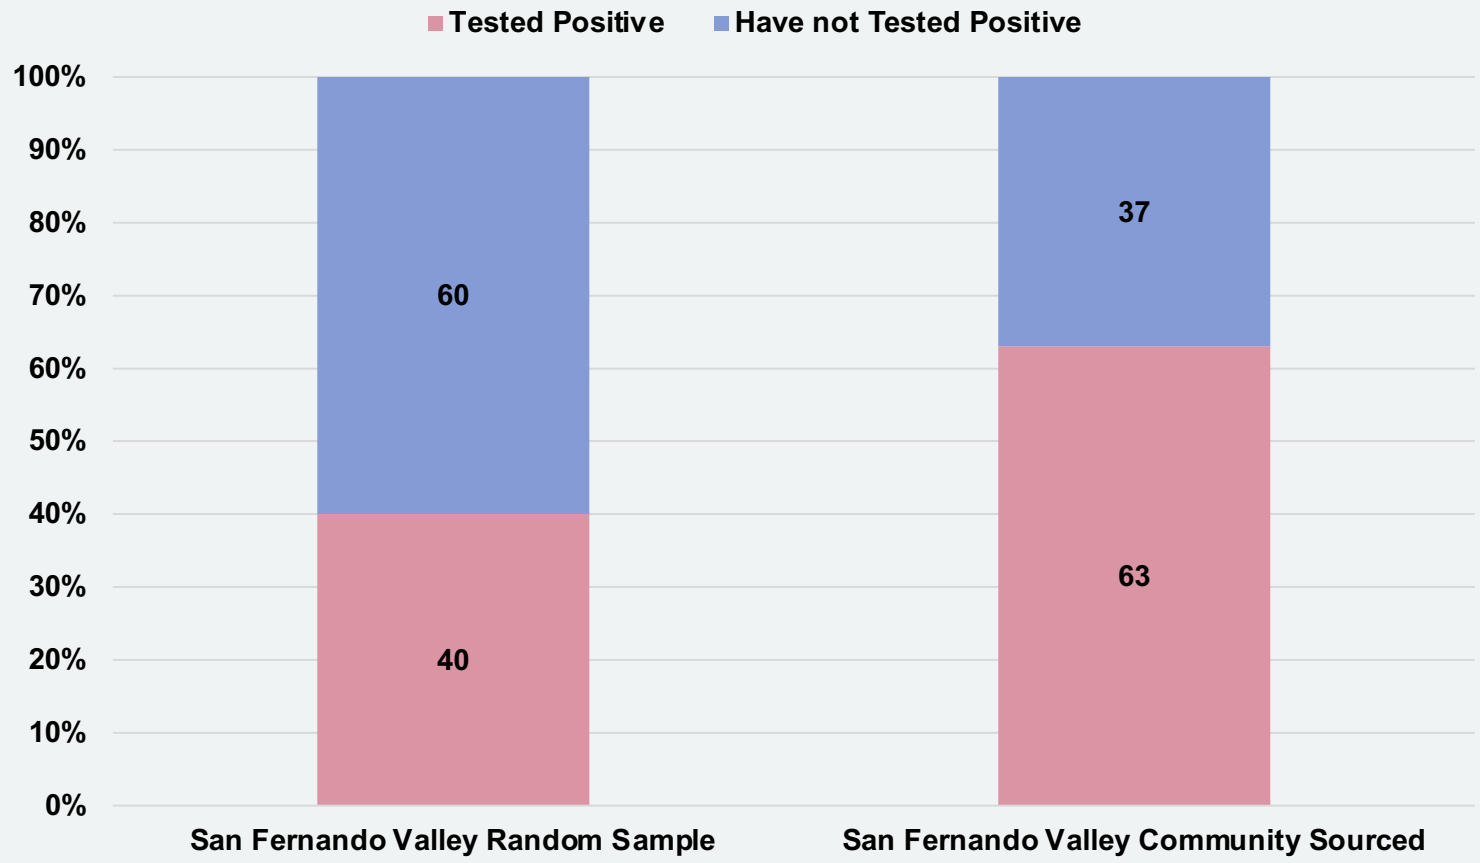

Vast majority have received at least 2 COVID vaccines

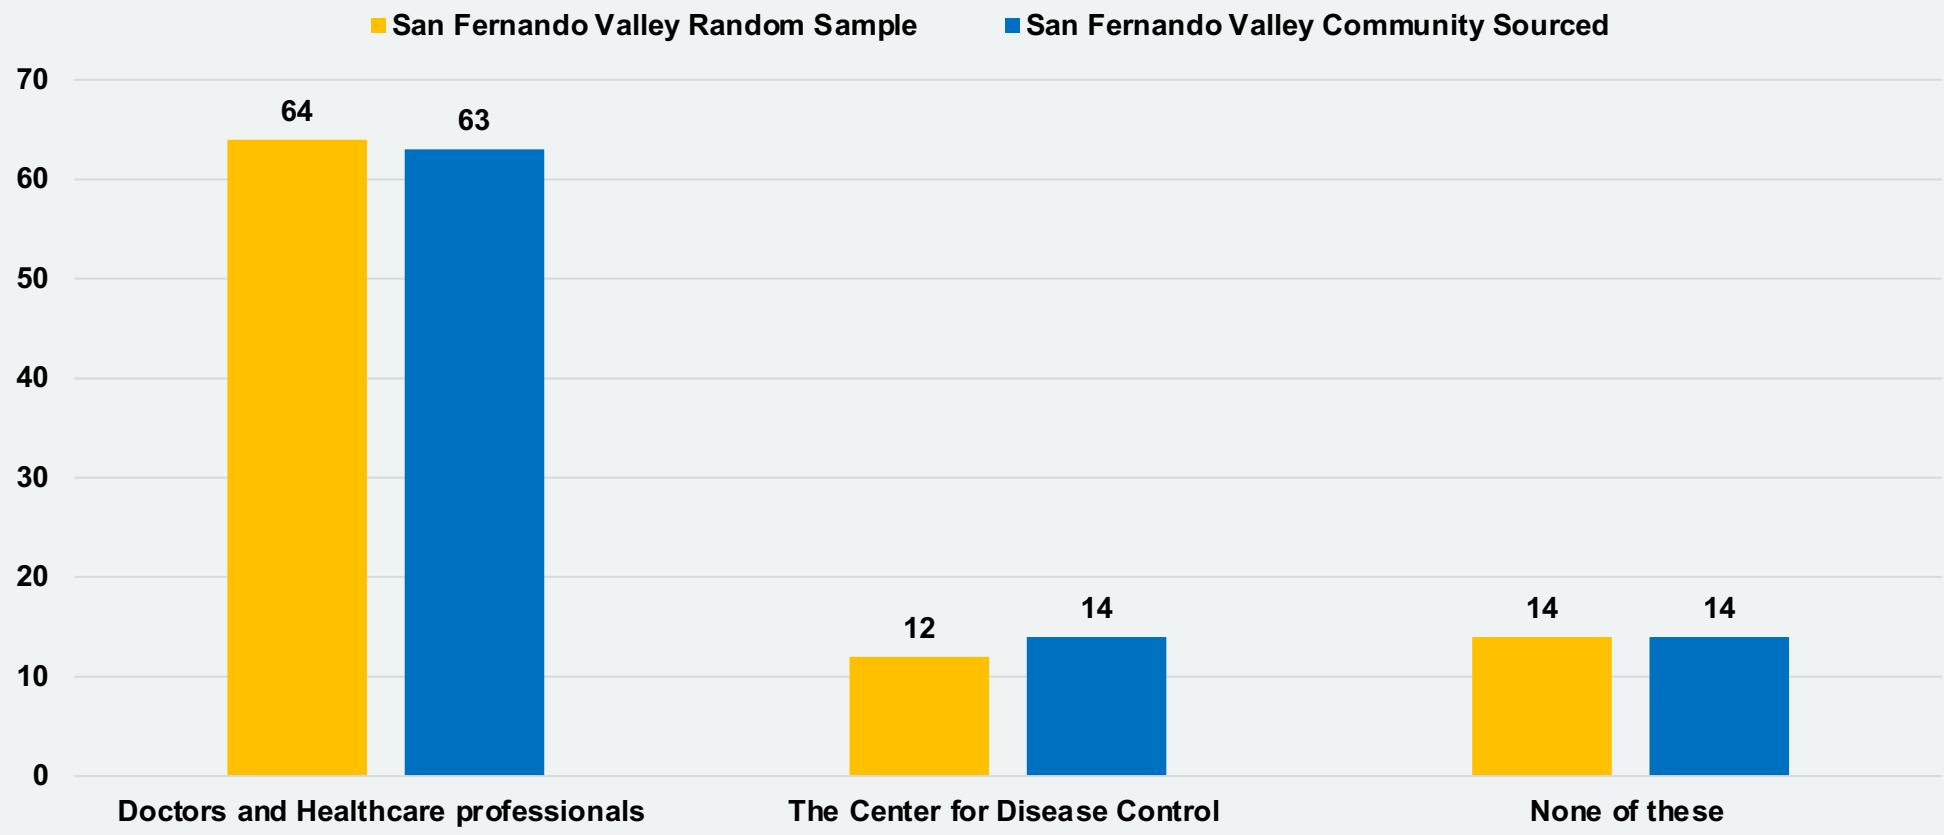

Majority reports regularly wearing their mask

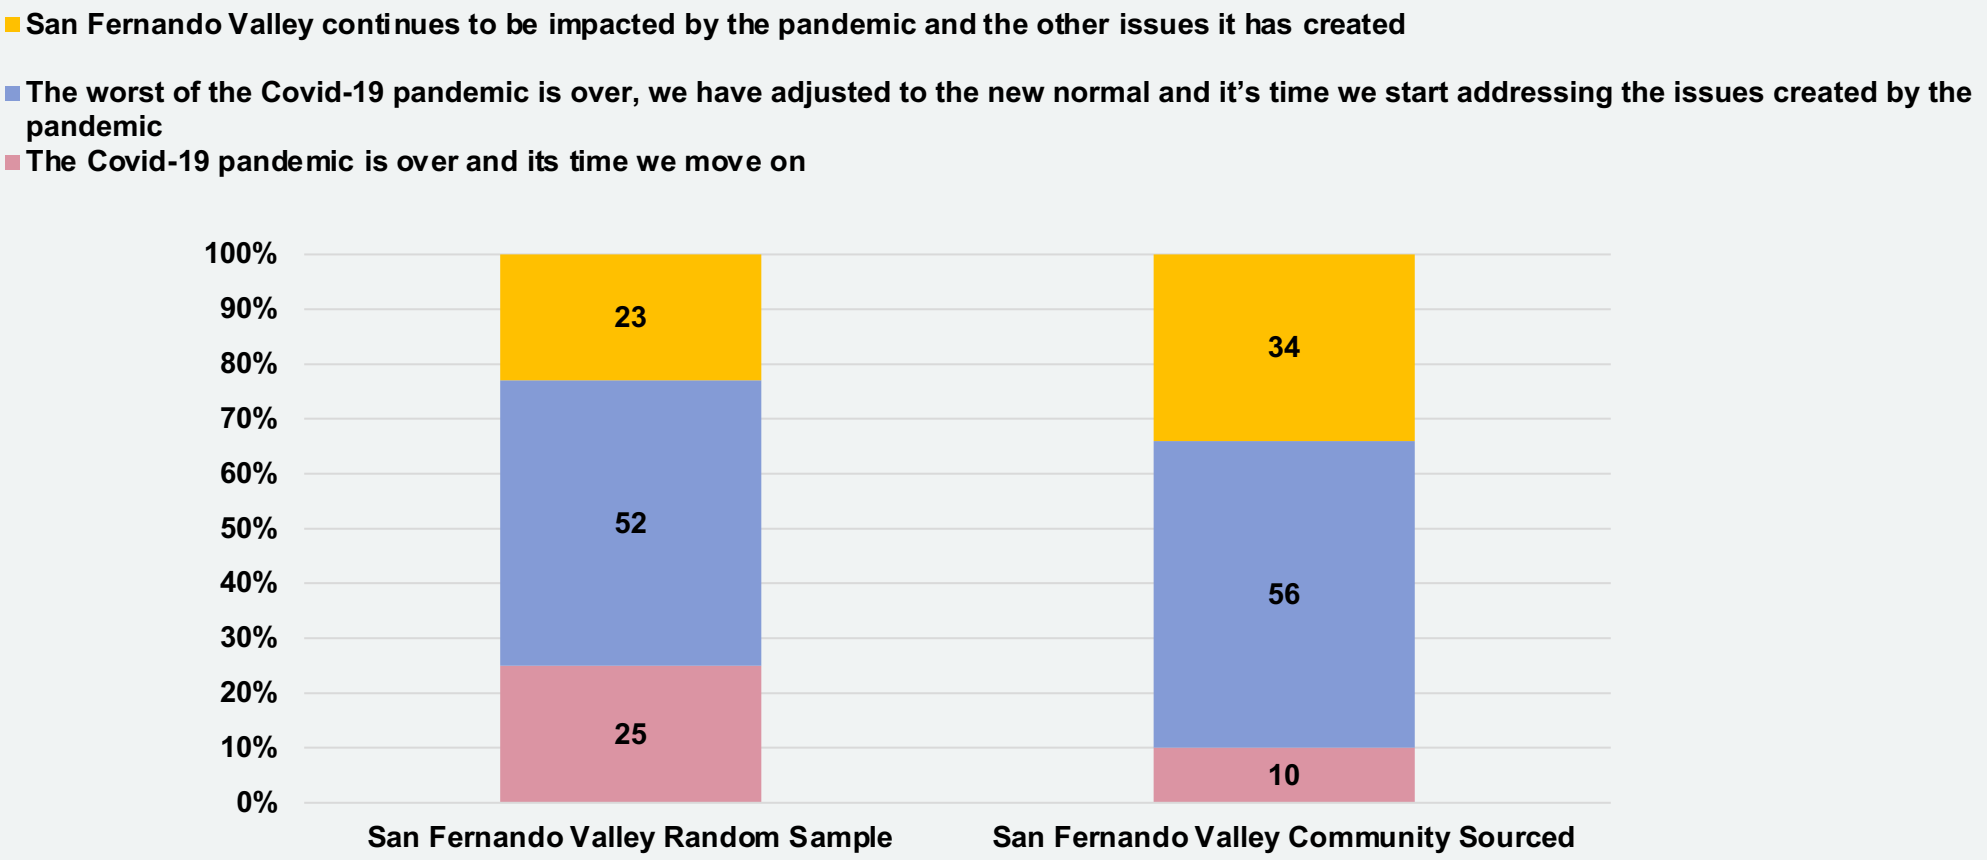

4 in 10 reported testing positive for COVID

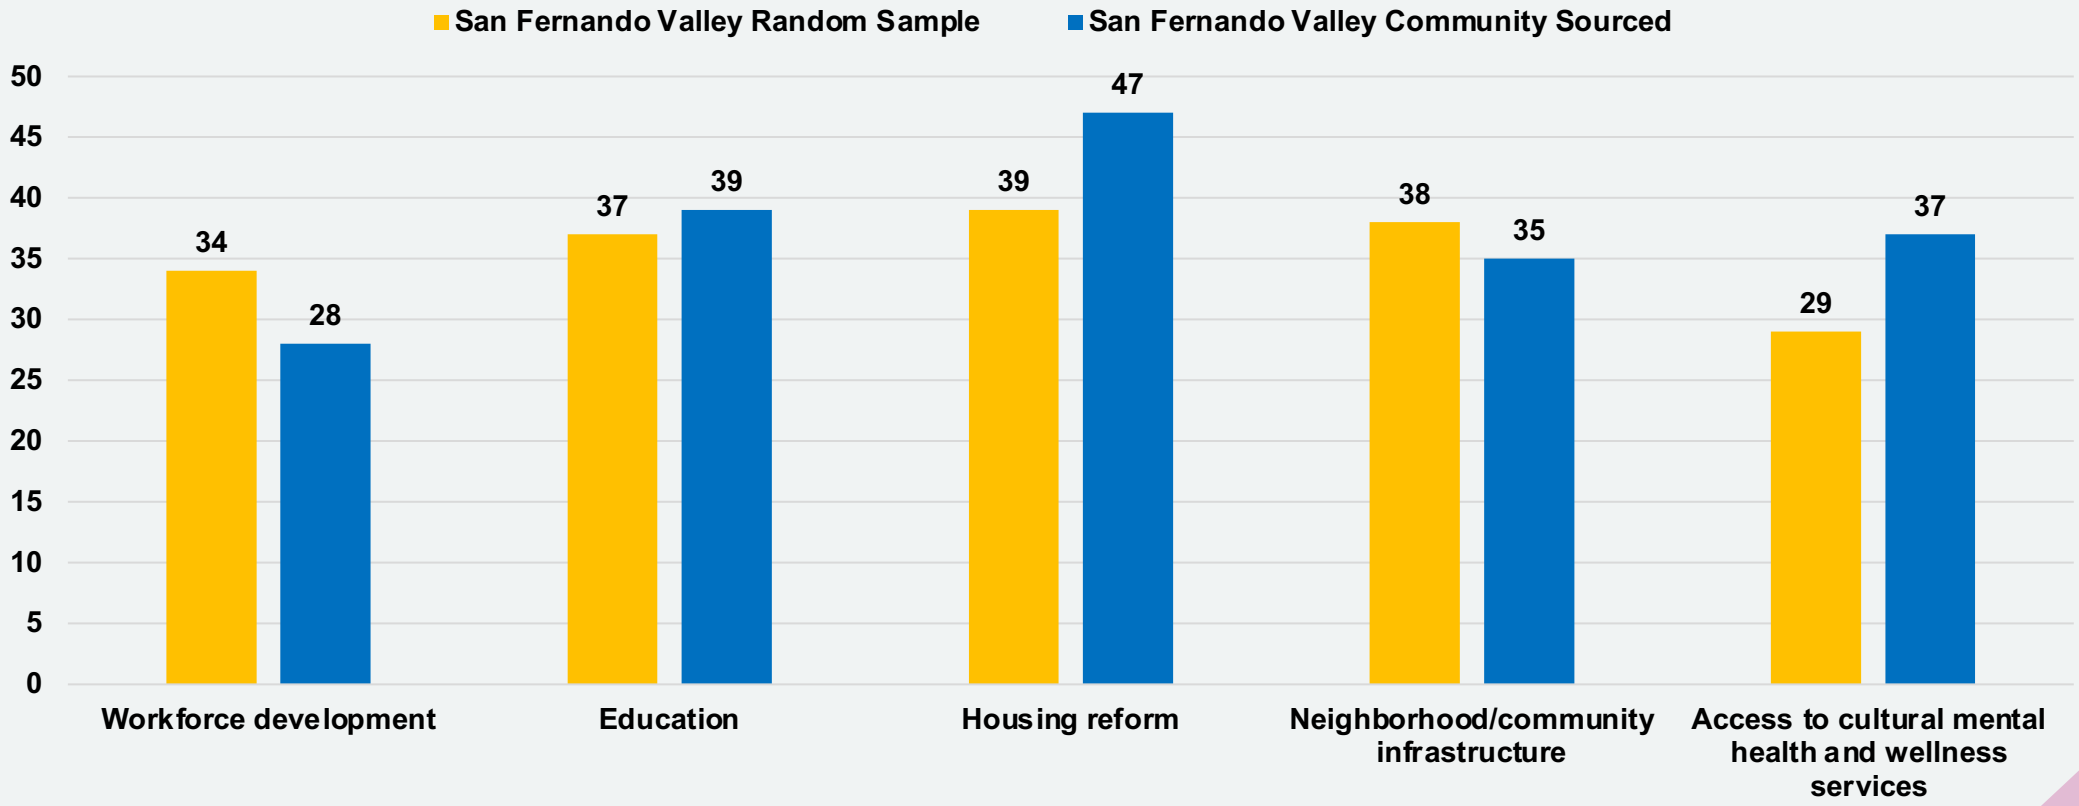

Doctors and healthcare professionals are the most trusted messengers for COVID guidance and recommendations

Majority believes the worst of the pandemic is over but there is a need to address the issues it created

SFV respondents highlight housing reform, community infrastructure, and education as crucial priorities
