- Mixed Mode: 75% online, 25% telephone

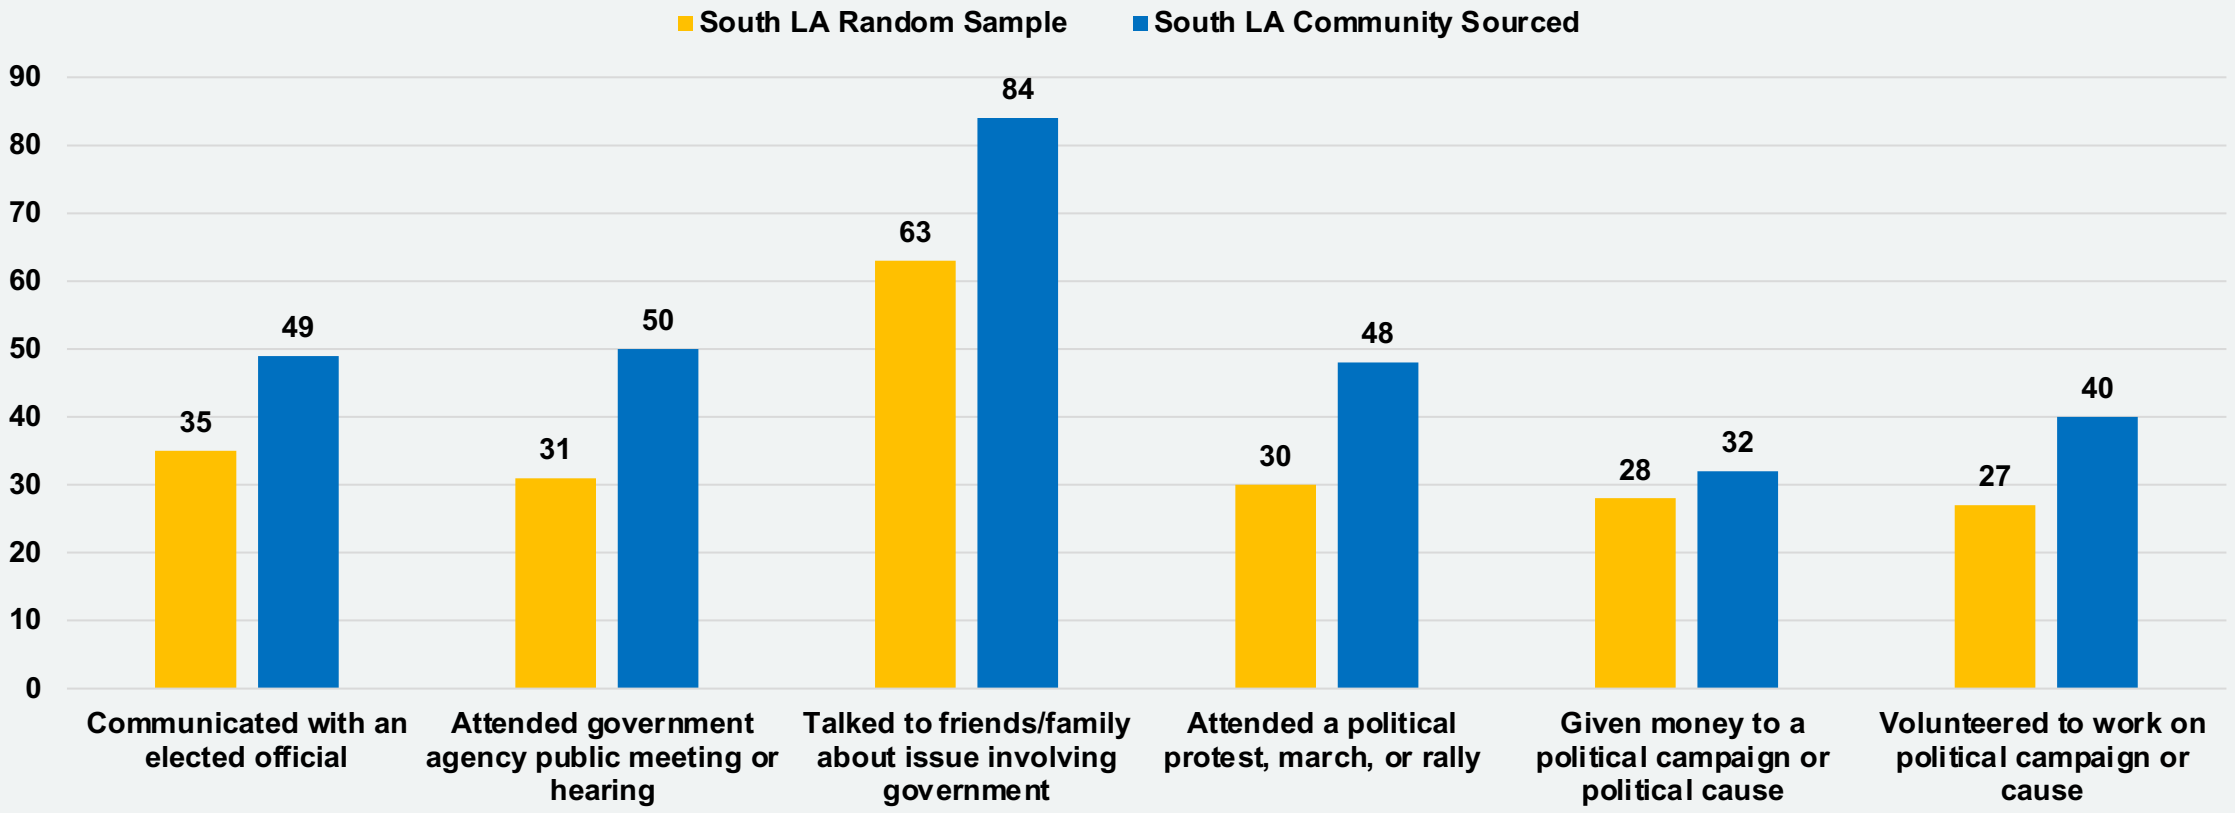

Roadmap to Understanding the Results & Comparisons

- South LA random sample
- South LA community sourced sample

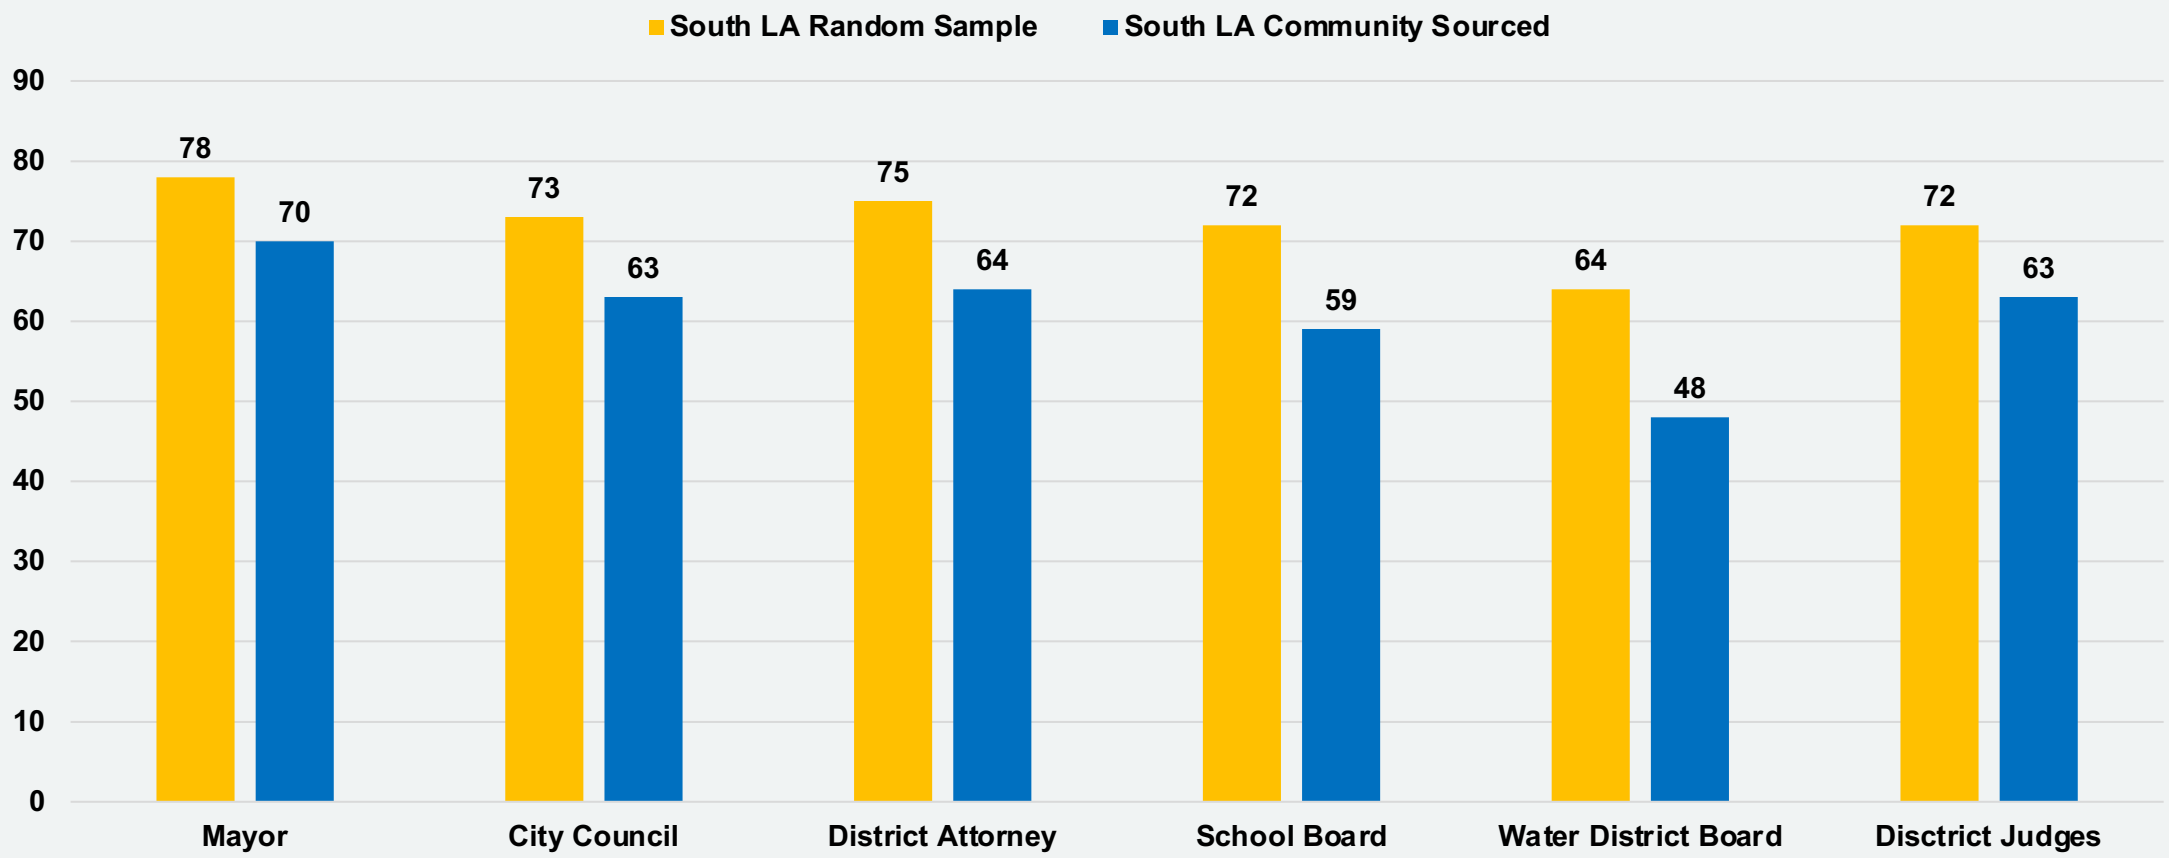

Sample Graph: Combined Household Income Less than $30k

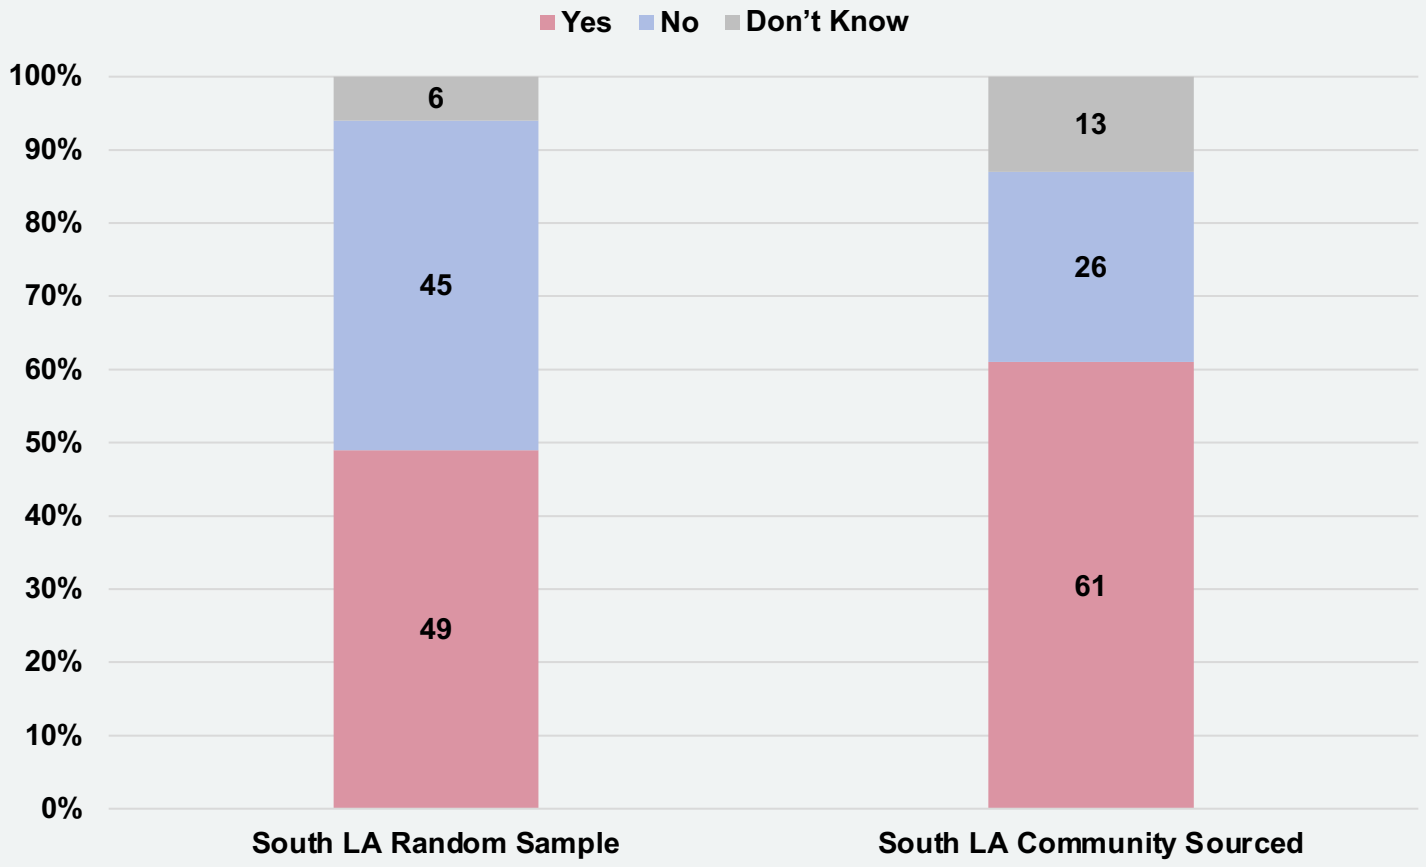

South LA respondents were very likely to talk with friends/family about an issue involving government during the pandemic

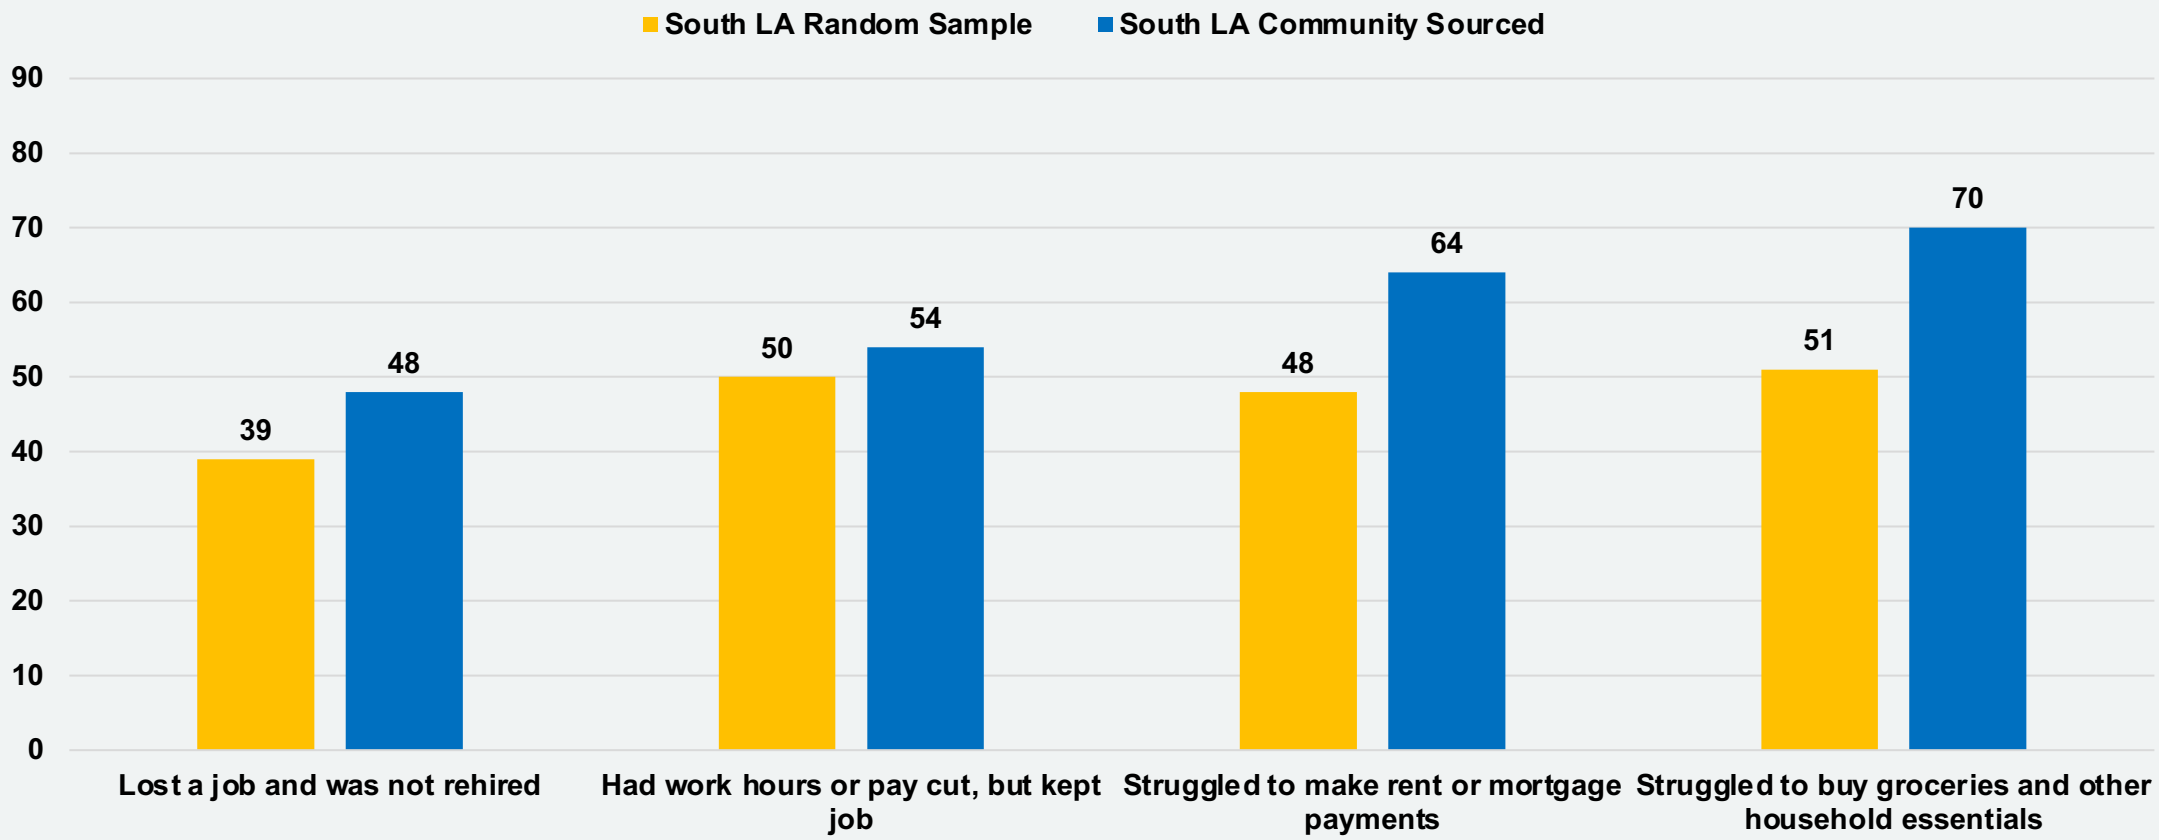

Majorities of South LA respondents reported voting for several local public offices

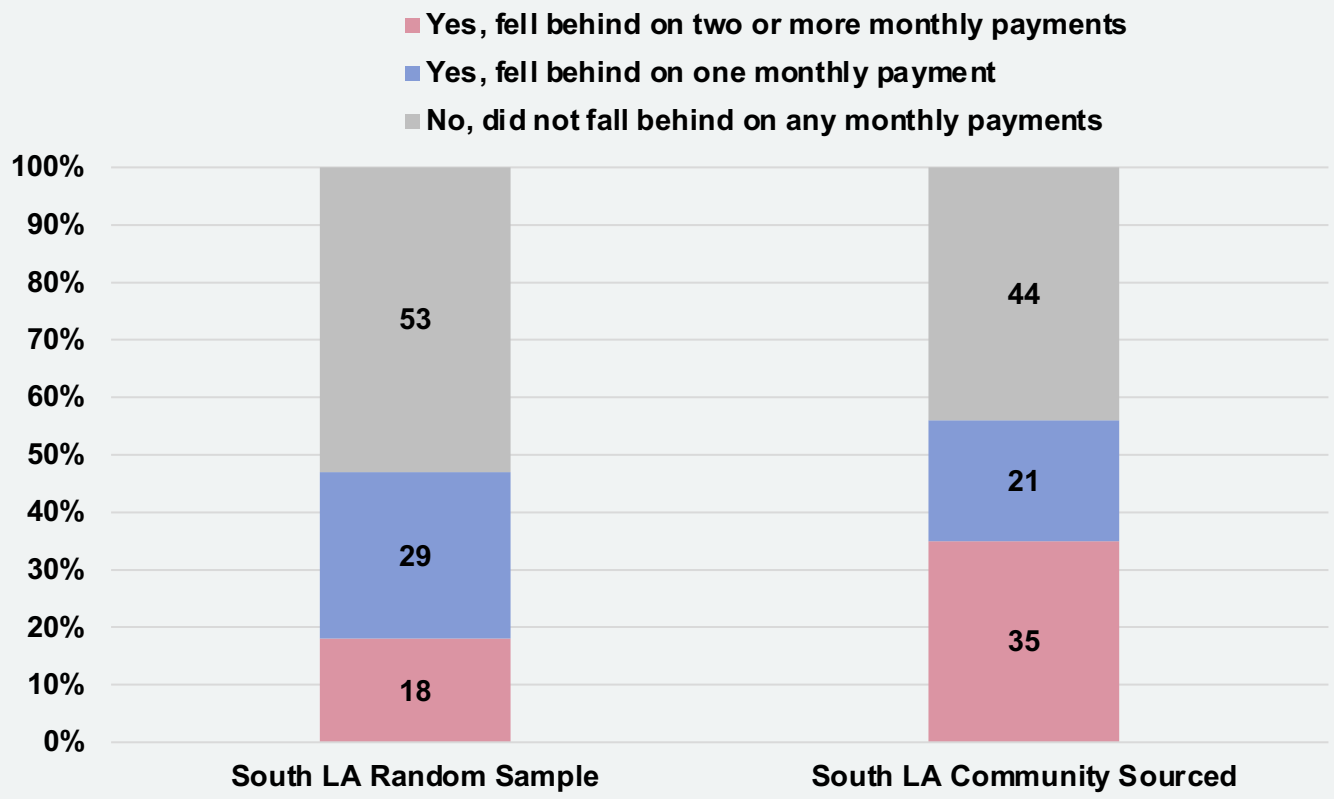

Voter engagement efforts reached about half of South LA respondents in the 2022 election cycle

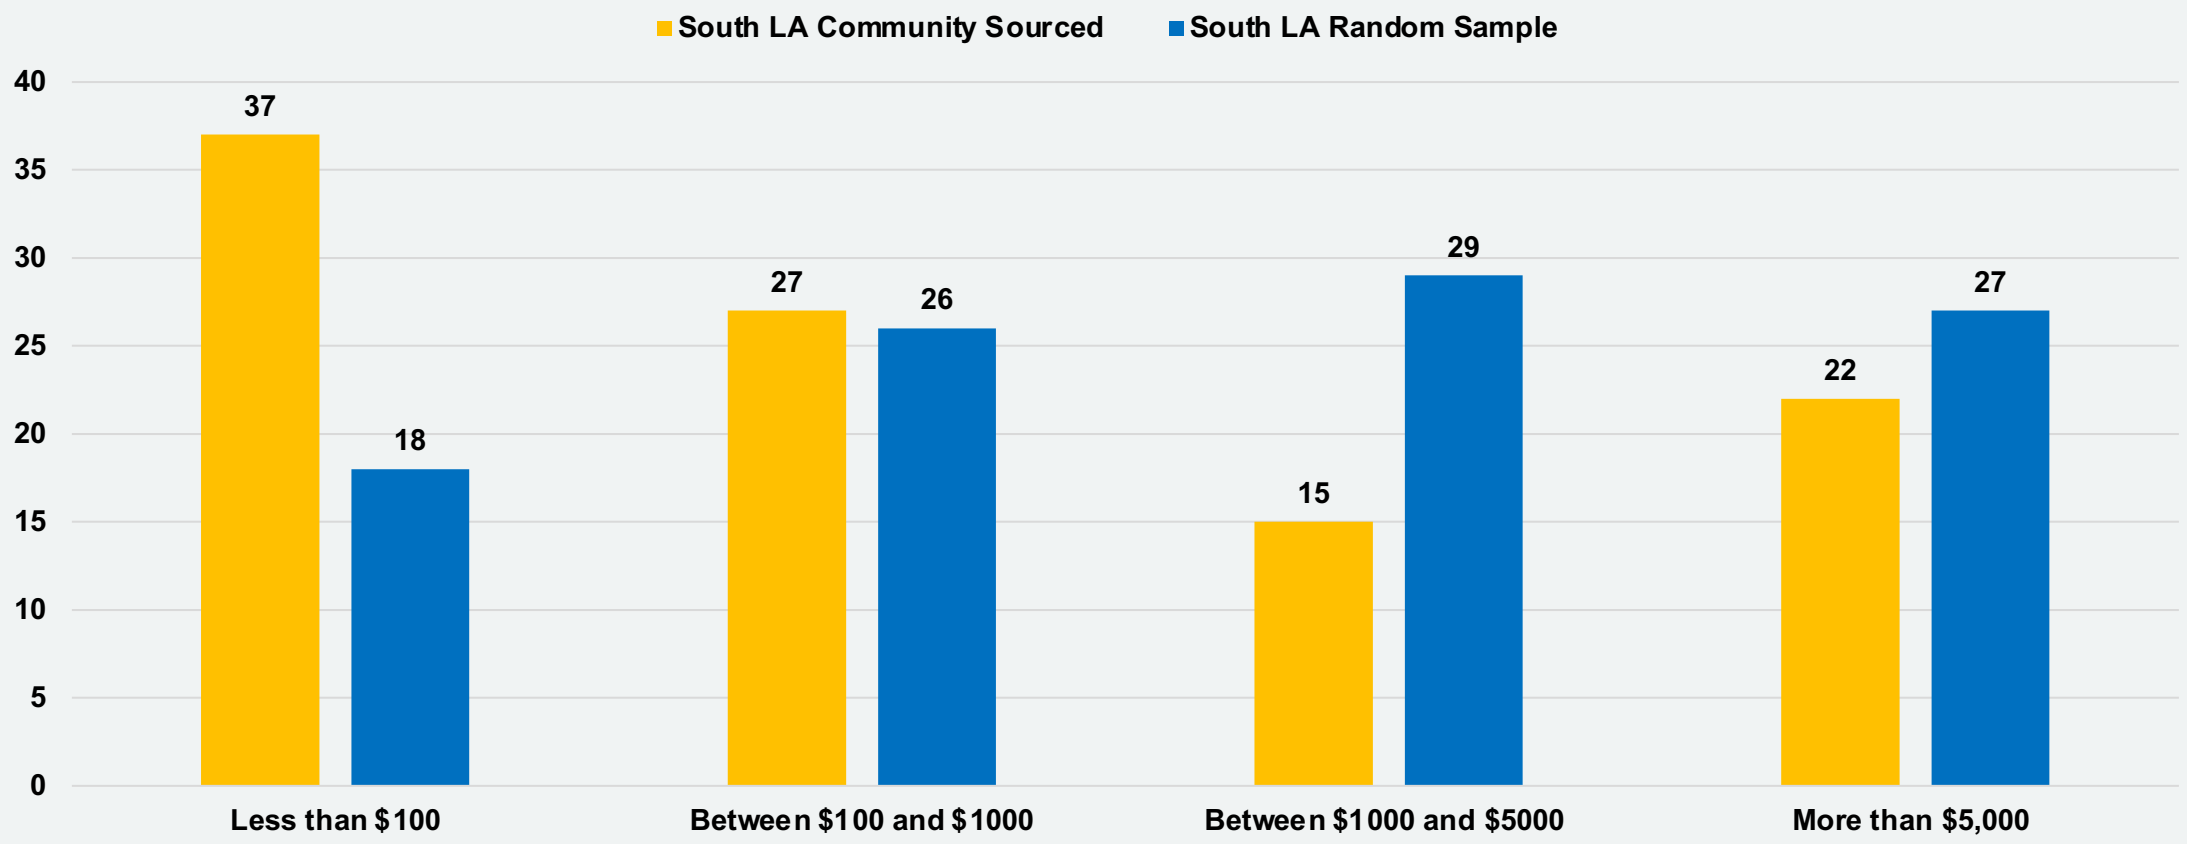

About half experienced cuts in work hours and struggled to make grocery and rent/mortgage payments during the pandemic

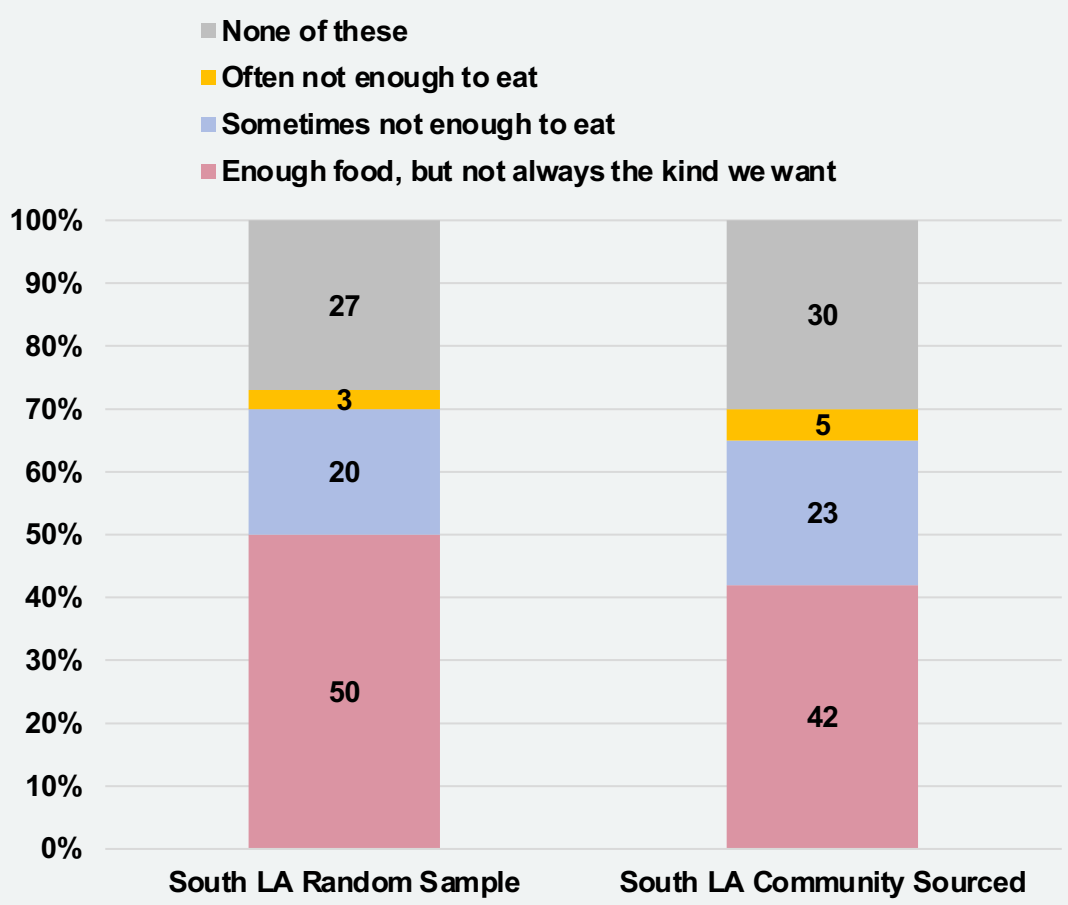

About half of South LA respondents fell behind at least 1 monthly payment (rent, mortgage, car, utility, etc.) since the pandemic began

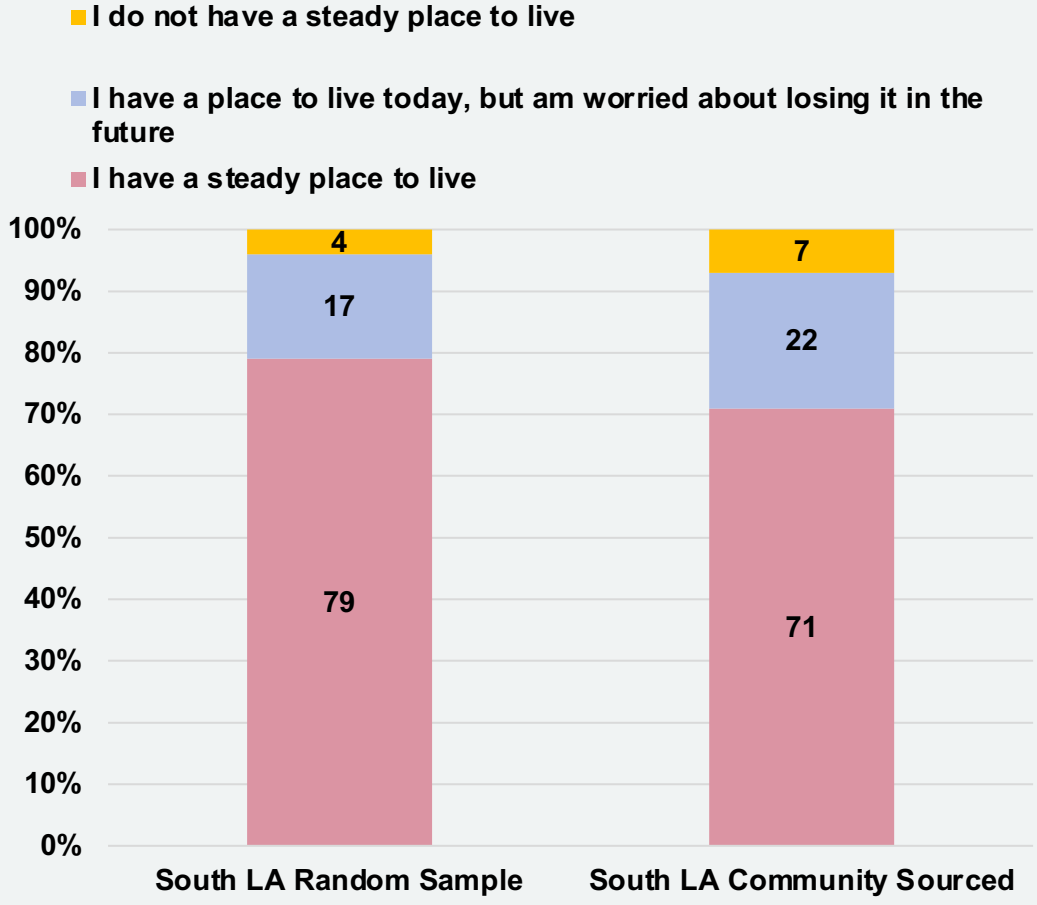

An alarming amount reported having less than $100 saved for emergencies

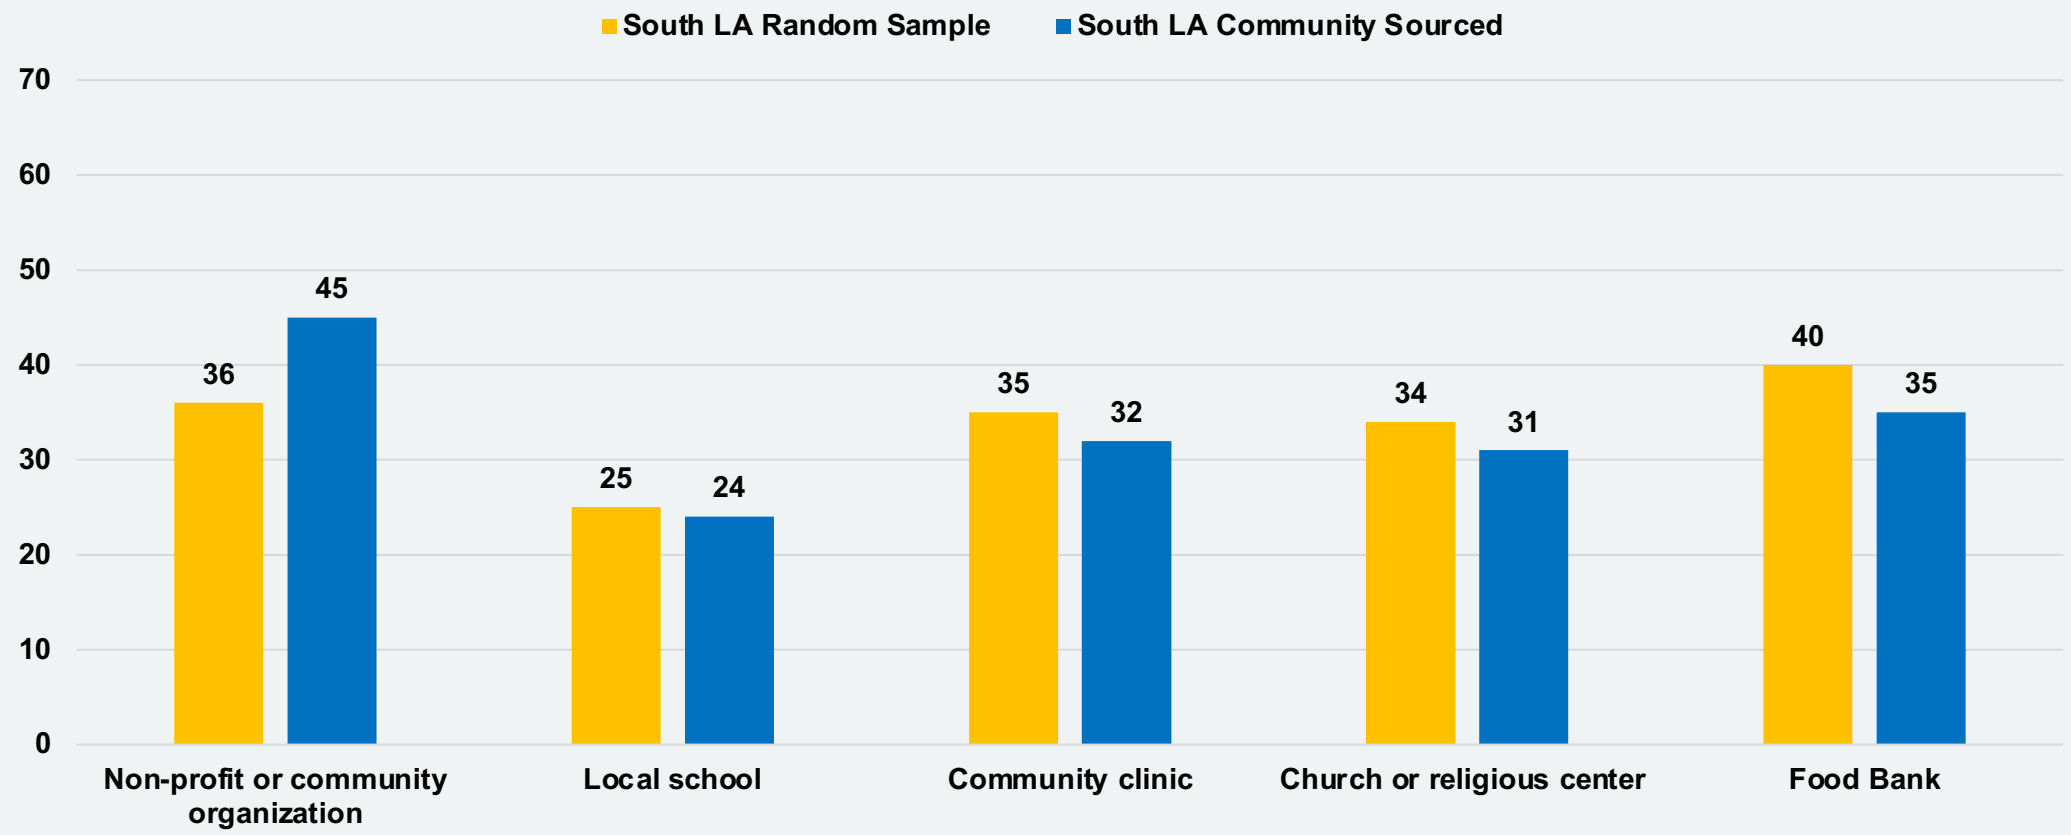

About 2 in 10 face food insecurity and about 2 in 10 face housing insecurity

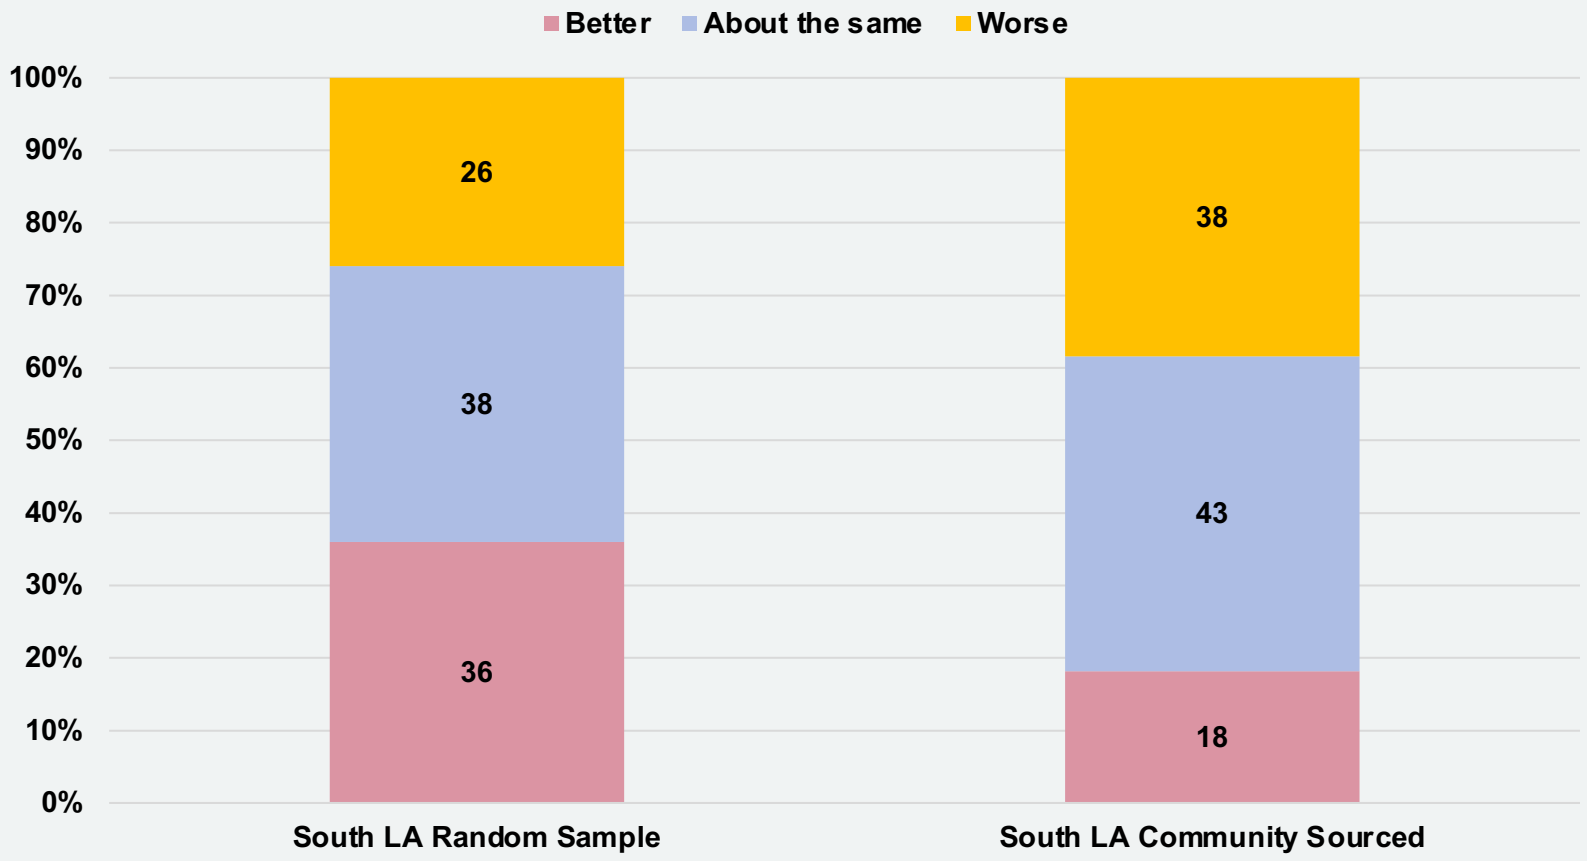

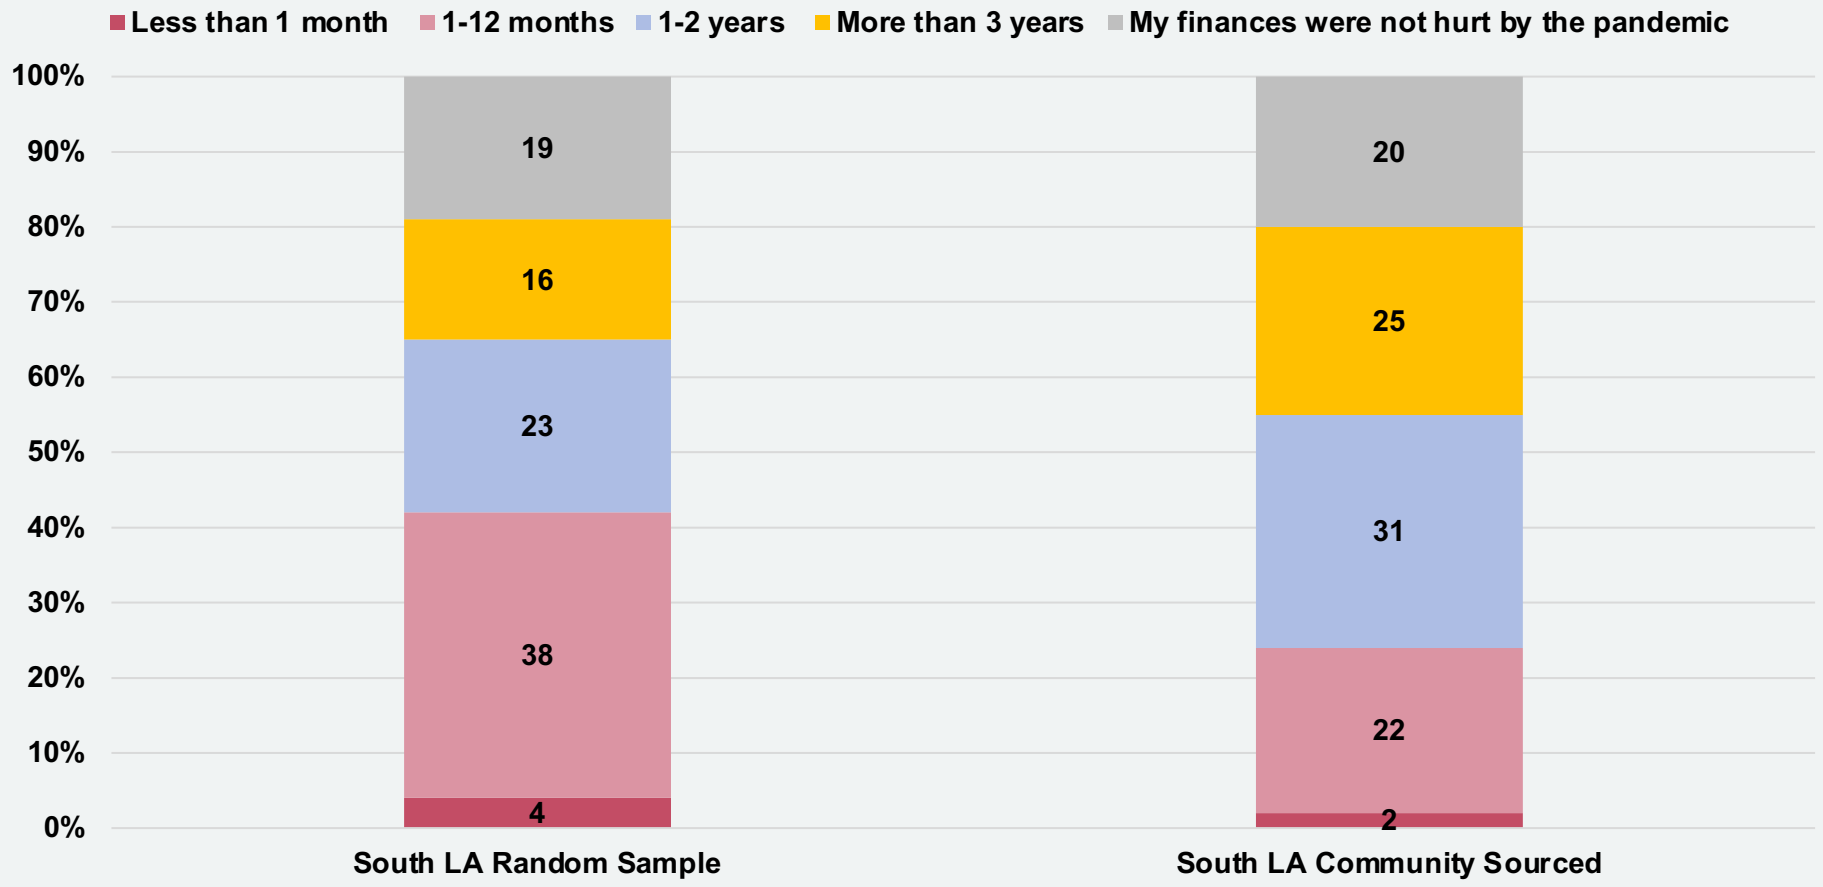

About a third of respondents have relied on several organizations for access to essential needs

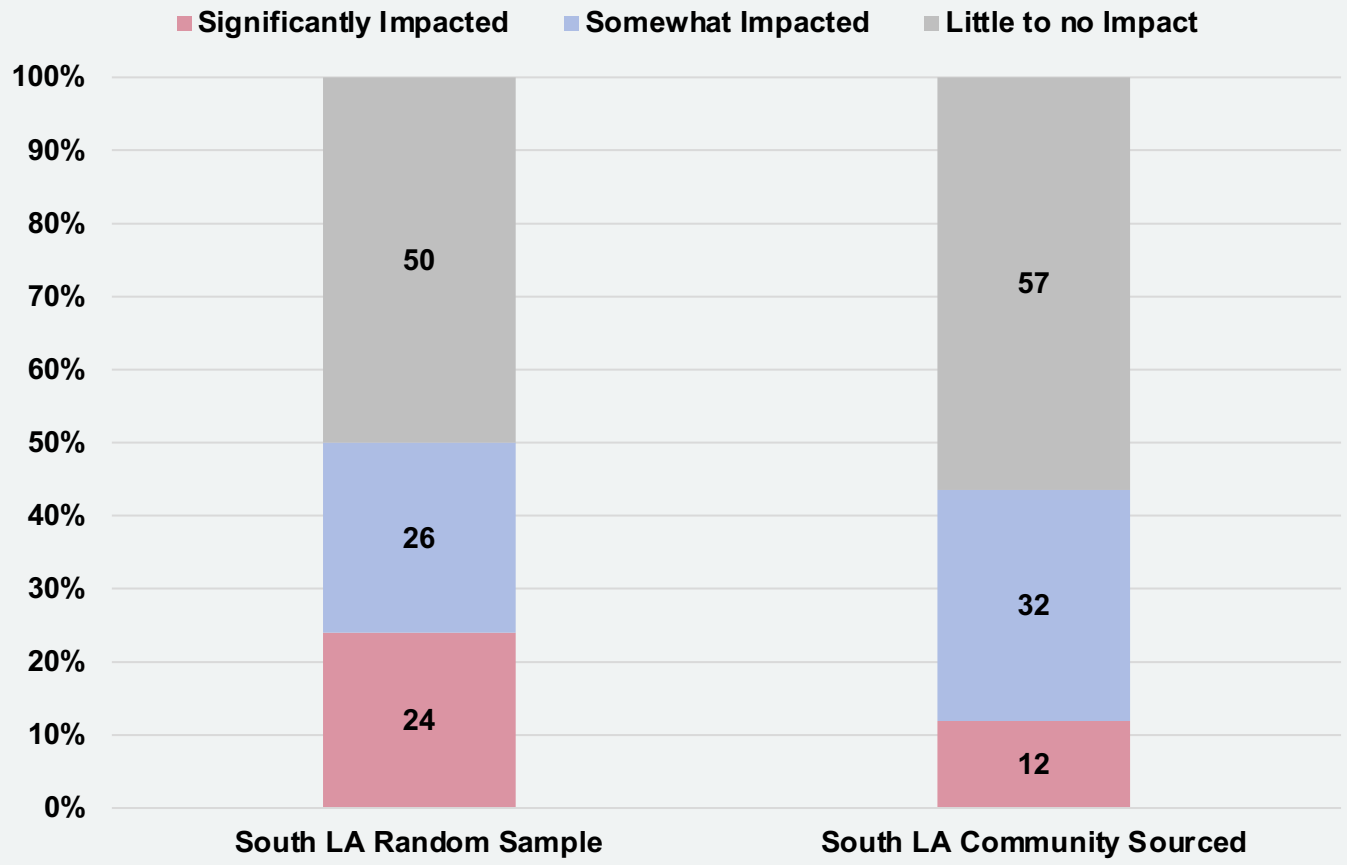

The financial situation of 1/4 of South LA respondents worsened since the pandemic began

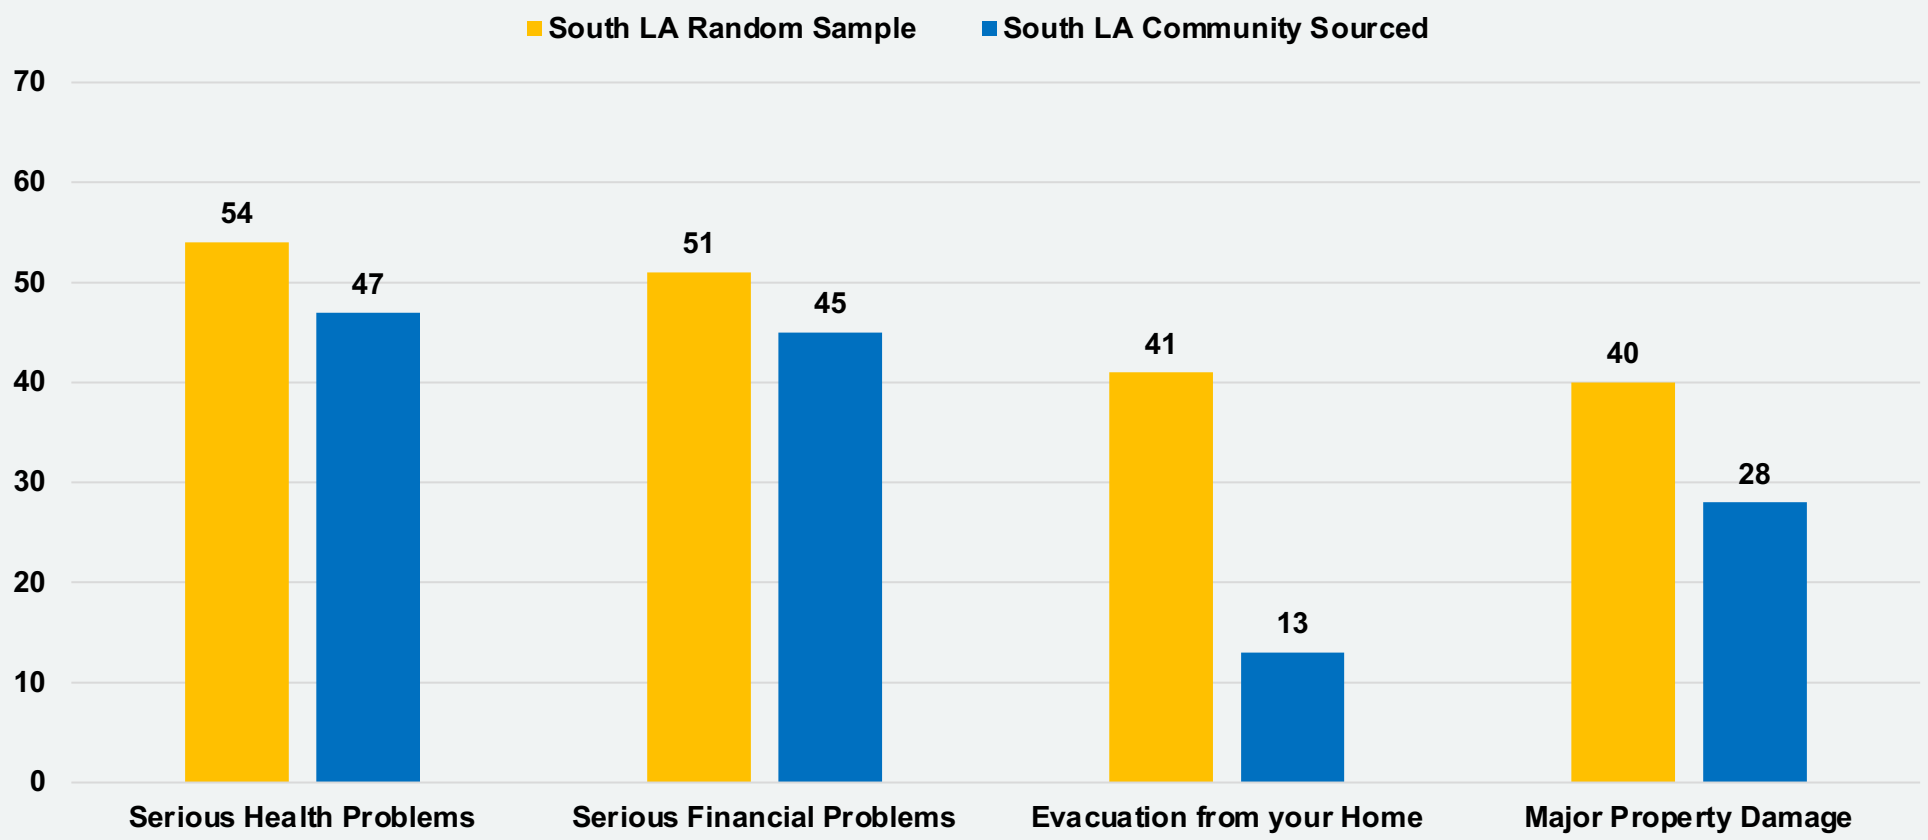

1 in 6 respondents believe it will take them more than 3 years to recover economically

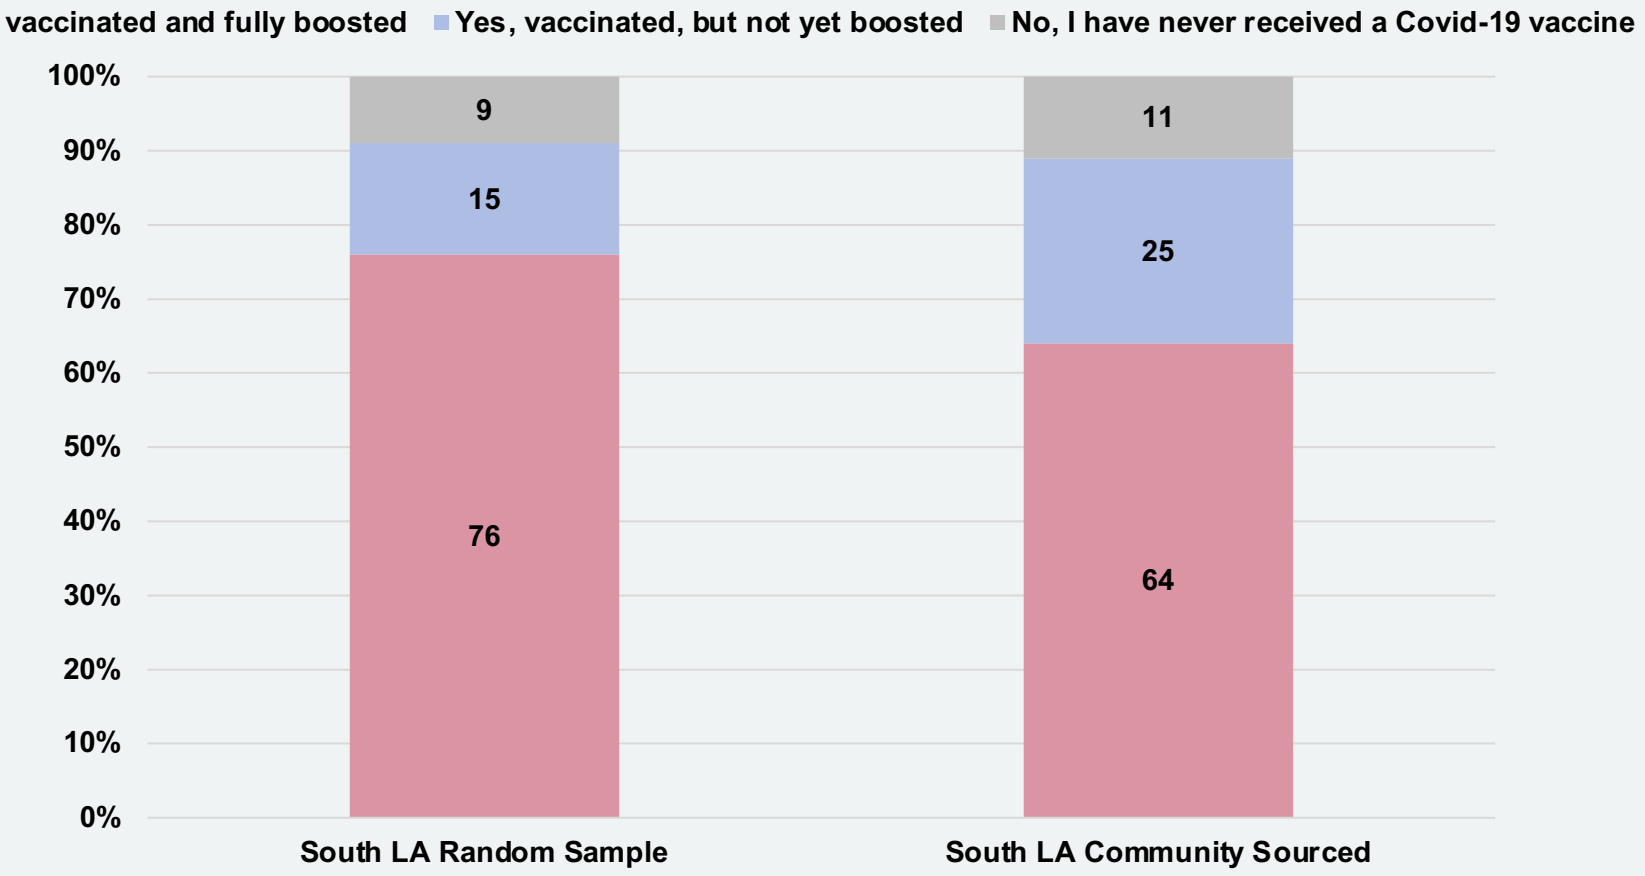

Half report having been affected by extreme weather
(heat, wildfires, drought, etc.)

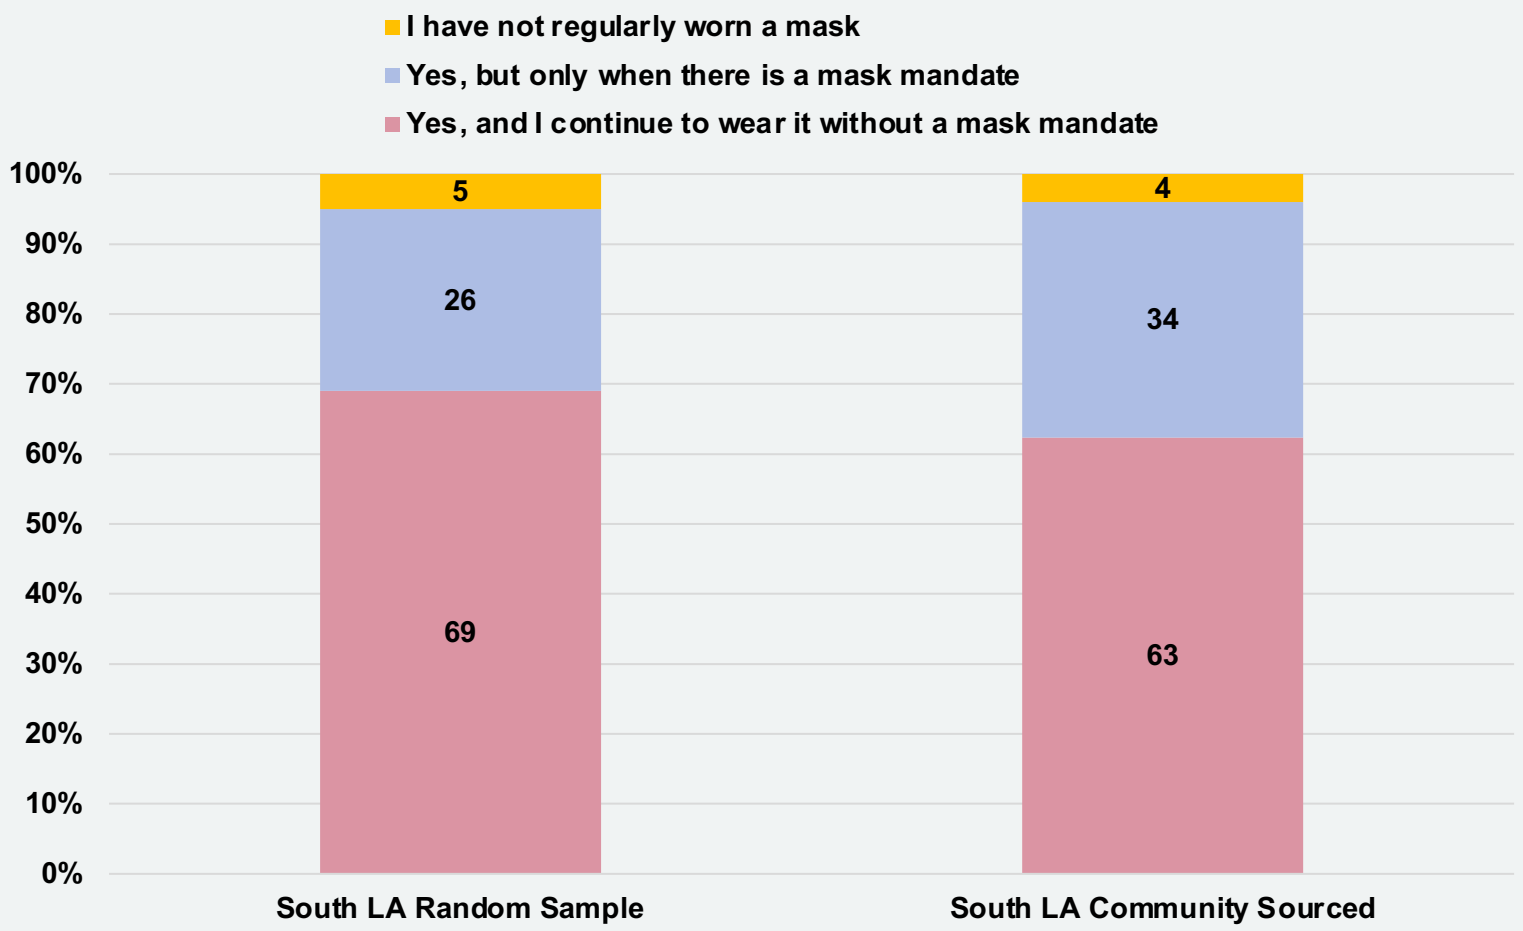

Slight majority reported suffering serious health and financial problems due to extreme weather

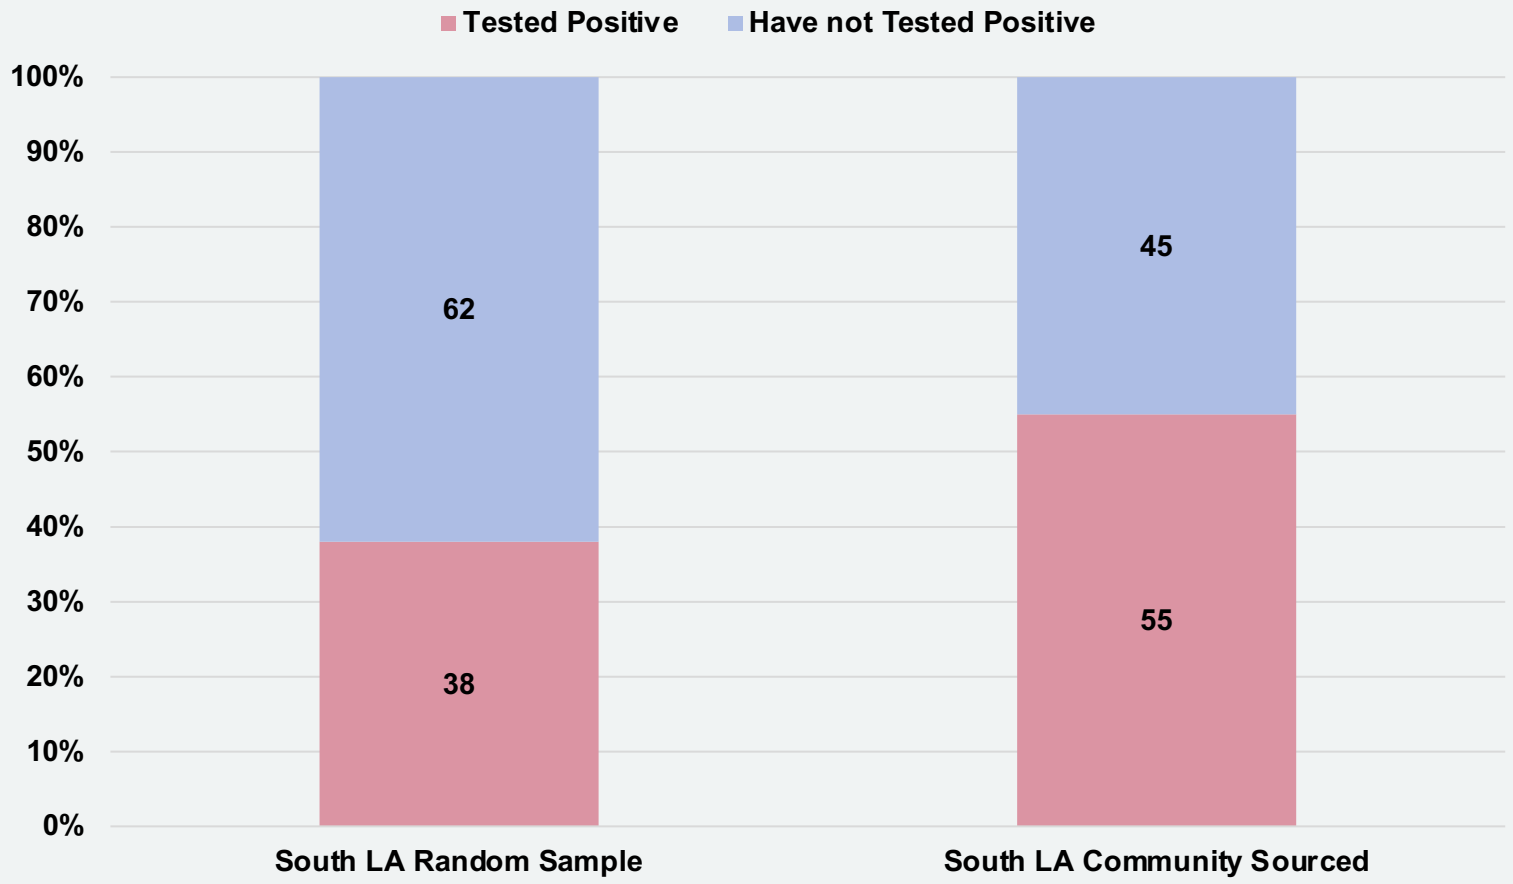

Vast majority have received at least 2 COVID vaccines

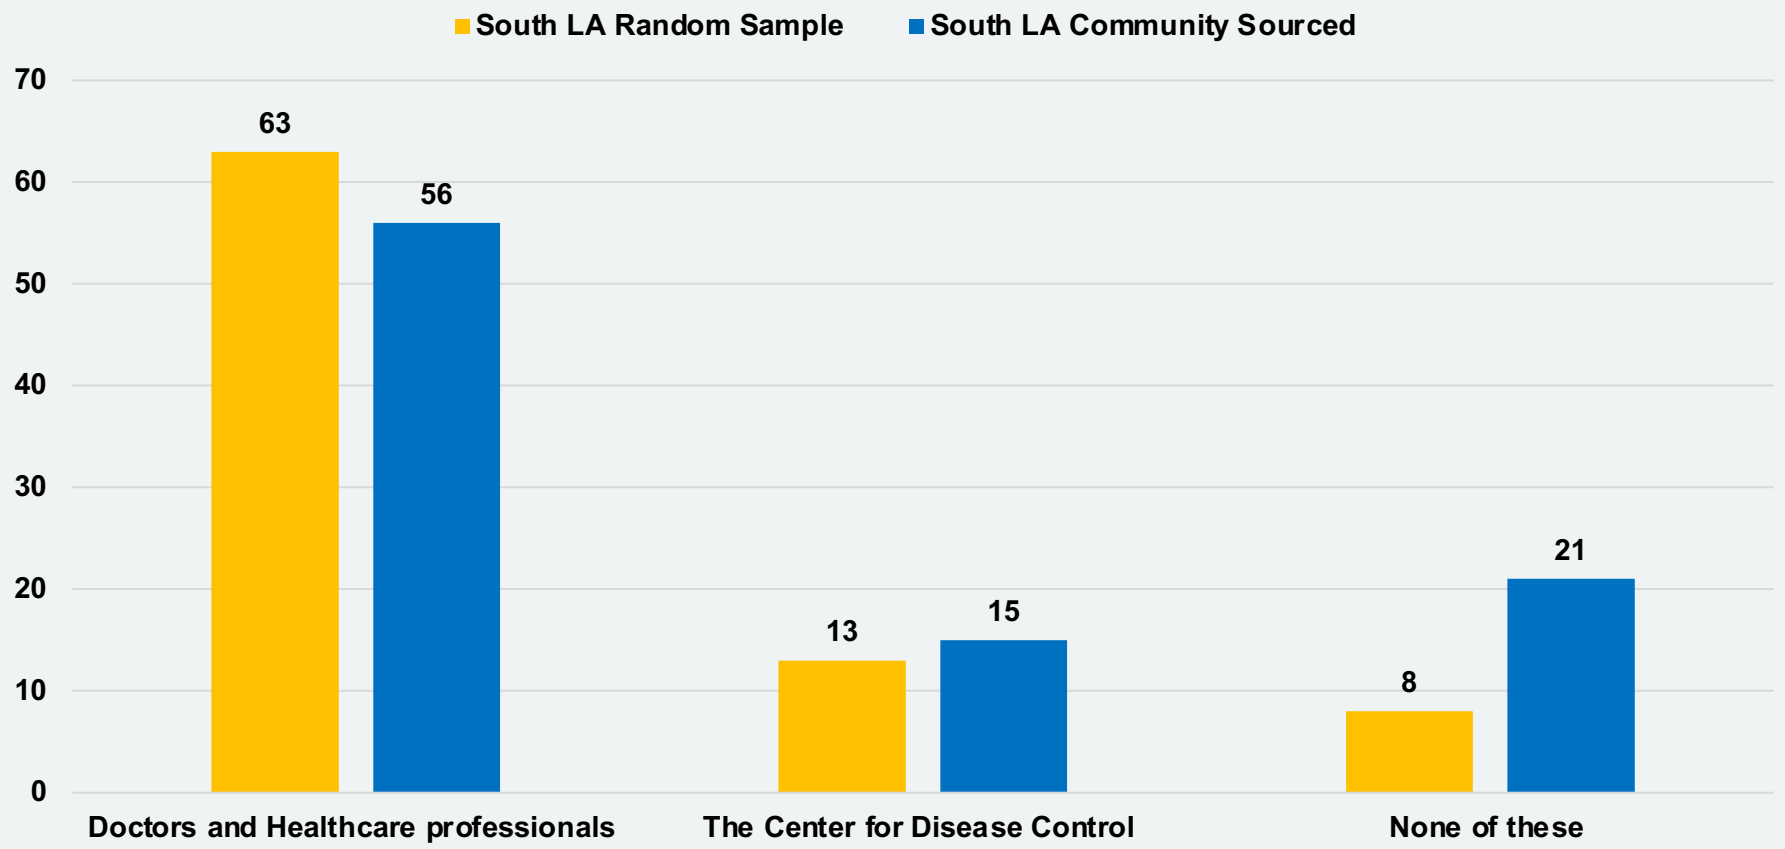

Majority reports regularly wearing their mask

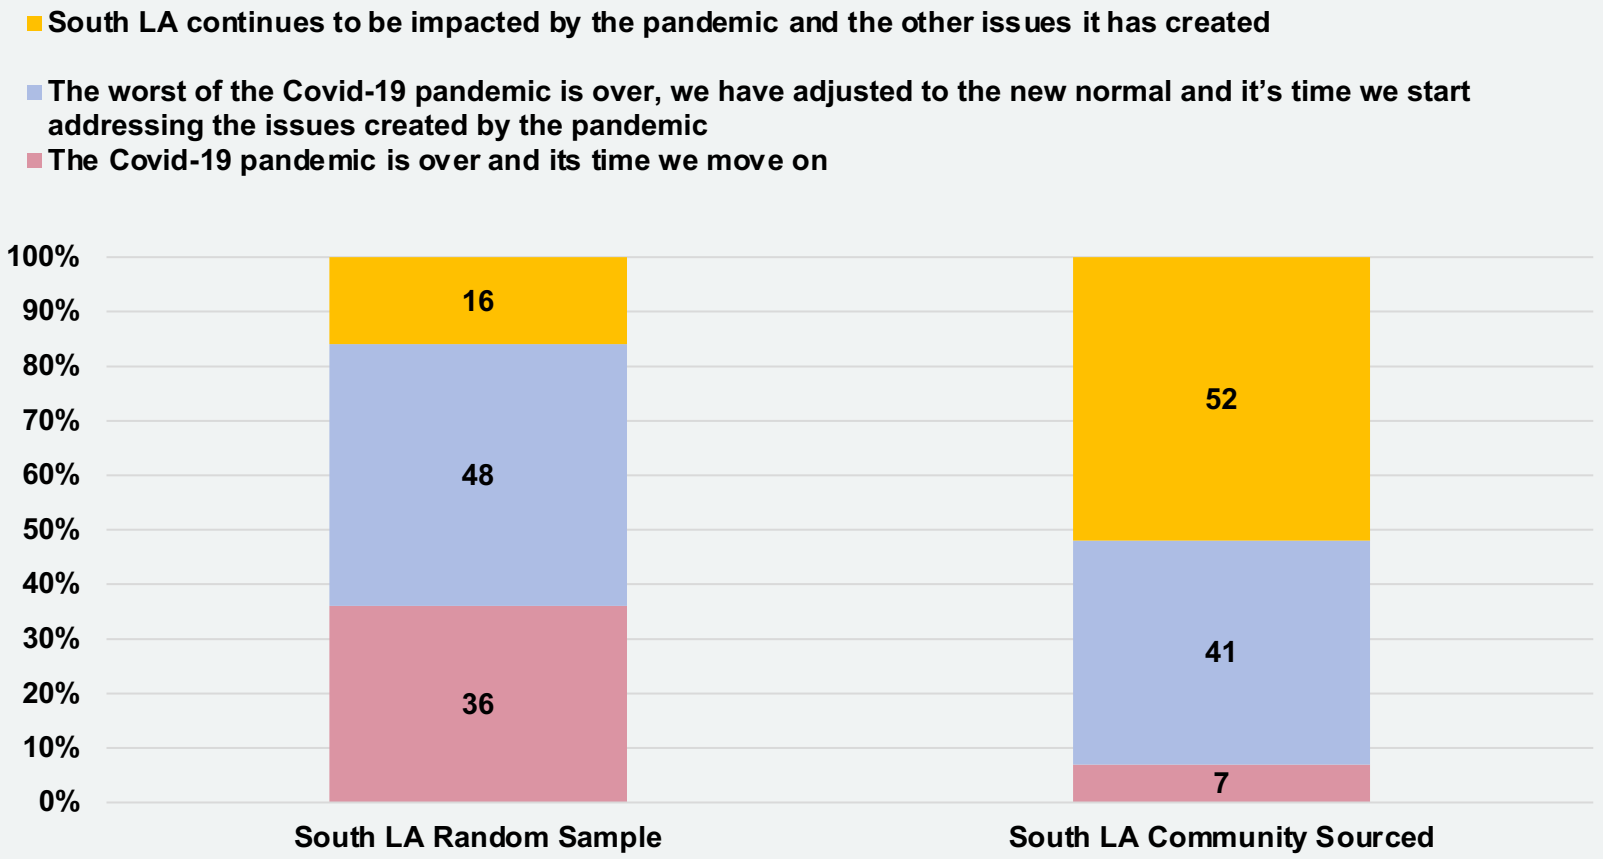

About 4 in 10 reported testing positive for COVID

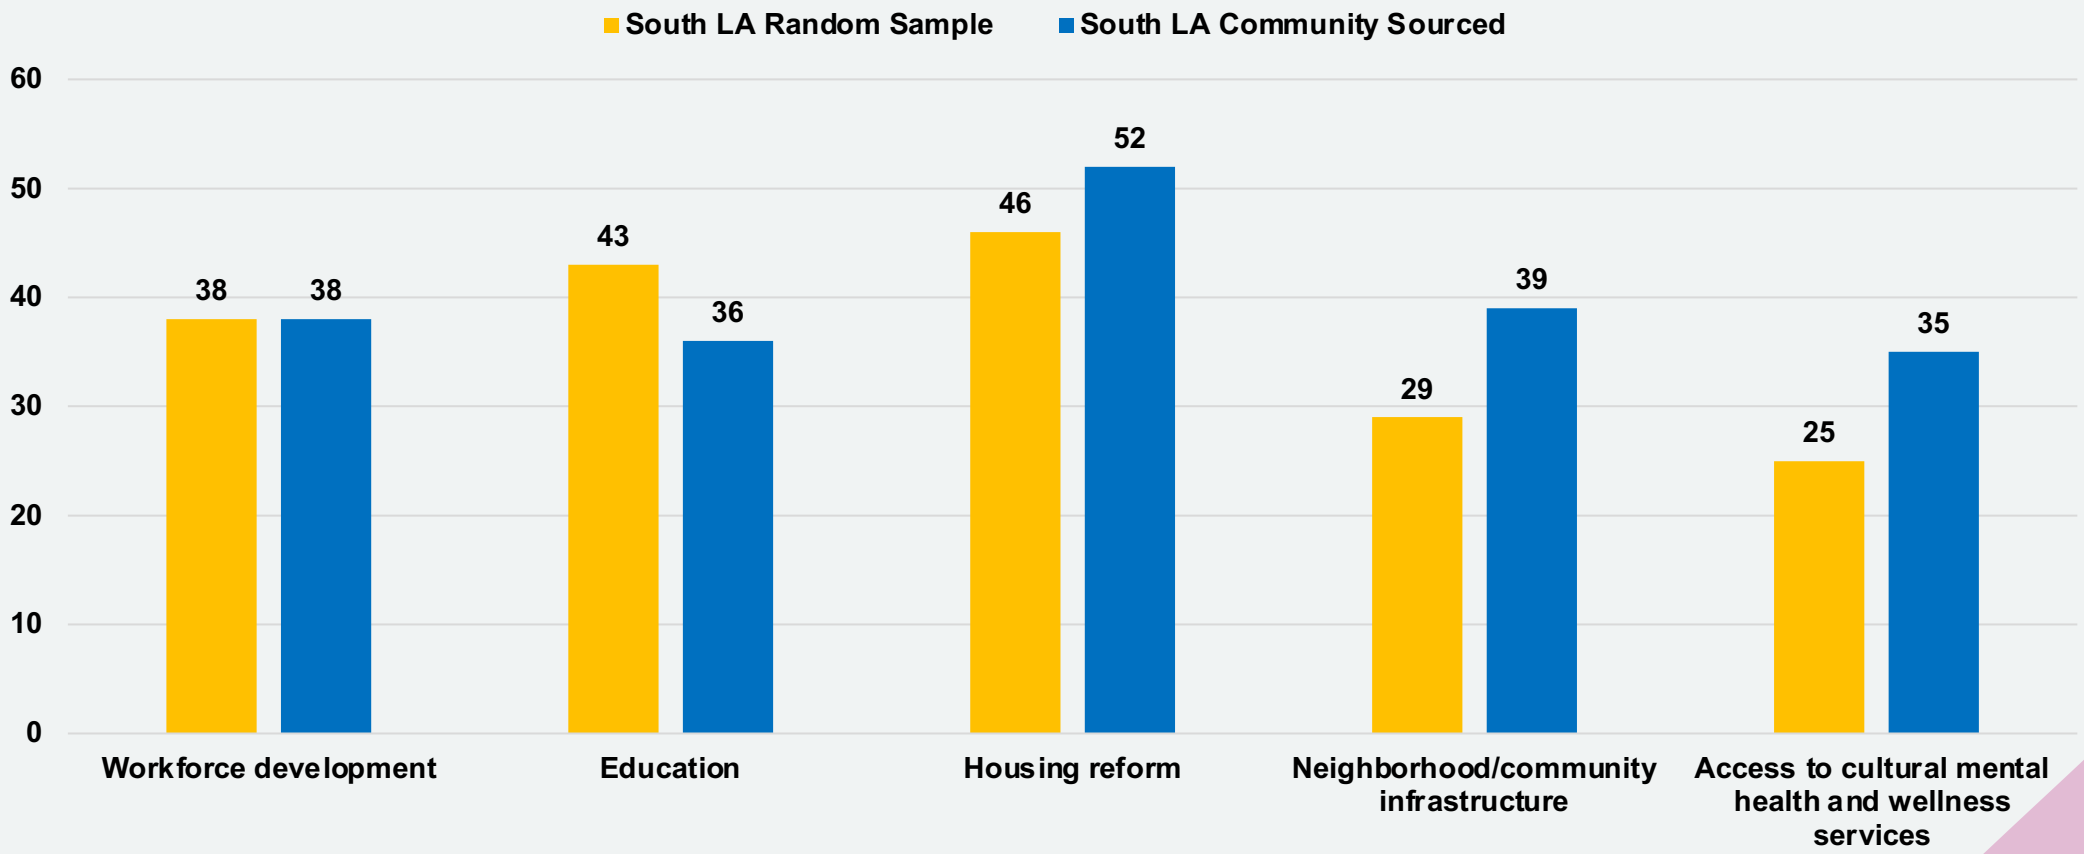

Doctors and healthcare professionals are the most trusted messengers for COVID guidance and recommendations

About half believe the worst of the pandemic is over but there is a need to address the issues created

South LA respondents highlight housing reform, education, and workforce development as crucial priorities
