NOT SO PLAYFUL PLAYGROUND

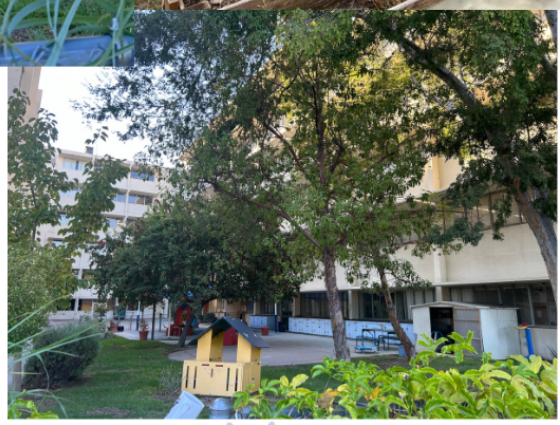

By: Raymoneek Wright, Hailey Robirds, Melanie Ortiz, Diana Chavoya

KING HALL PLAYGROUND SITE (BEFORE)

- Existing wildlife
- Trees
- Dormant soil
- Dilapidated surfaces

OBJECTIVE/VISION

- Recreation through establishing bio diversity and maintain sustainability
- Promoting sufficiency through food security
- Being granted the opportunity to build coexisting skills with the environment around them
- Emphasizing the importance of natural preservation and examples

“Visualizing is day dreaming with a purpose.” - Bennett”

KING HALL PLAYGROUND SITE (AFTER)

- Sanitized play area
- Increased vegetation
- Small, mobile tiered planters for herbs(basil, mint, etc.)
  - Small fruits and vegetables (cherry tomatoes, strawberries, etc.)
- Flowers and bushes to attract biodiversity
  - plant sustainability, pollination (butterflies, humming birds)
  - Plants for California weather and attract pollinators (Lavender, Erigeron glaucus, Beardtongue)
- Healthy relationship with surrounding environment
- Routinely maintain shrubs, plants, produce, etc.
