How many course sections should I be scheduling?
In order to determine how many sections, first determine the number of majors and class level.

Example: Daily Major Report – Business major

Fall 17 Majors	**LD**		**UD**	
	10	**20**	**30**	**40**
BE	562	552	1062	1757
Total		**1114**		**2819**

GRAD	**G1**	**G2**	**G3**
	19	301	49
Total (G1+G2)		**320**	

How many LD, UD, and Grad courses should be offered?

Example: Business course offerings

- Based on the daily major report, and using the BUS degree roadmap, calculate ¼ of your majors per LD or UD course offerings.
- For instance, BUS has 1114 LD majors and 5 core LD requirements. The number of students who need the course (1/4 of 1114) will determine how many sections you will need to offer that term.

	Courses	**BUS Core**	**# needing/semester**
LD REQD	ACCT 2100	1/4 of (1114) LD majors	279
